Muhammads-MacBook-Pro:~ MuhammadIshaq$ brew

Example usage:

  brew search [TEXT|/REGEX/]

  brew (info|home|options) [FORMULA...]

  brew install FORMULA...

  brew update

  brew upgrade [FORMULA...]

  brew uninstall FORMULA...

  brew list [FORMULA...]

Troubleshooting:

  brew config

  brew doctor

  brew install -vd FORMULA

Developers:

  brew create [URL [--no-fetch]]

  brew edit [FORMULA...]

  https://docs.brew.sh/Formula-Cookbook.html

Further help:

  man brew

  brew help [COMMAND]

  brew home

Muhammads-MacBook-Pro:~ MuhammadIshaq$ brew update

Already up-to-date.

Muhammads-MacBook-Pro:~ MuhammadIshaq$ brew install python

==> **Installing dependencies for python: pkg-config, readline, sqlite, gdbm, openssl**

==> **Installing python dependency: pkg-config**

==> **Downloading https://homebrew.bintray.com/bottles/pkg-config-0.29.2.yosemite.**

100.0%

==> **Pouring pkg-config-0.29.2.yosemite.bottle.tar.gz**

🍺 /usr/local/Cellar/pkg-config/0.29.2: 11 files, 631KB

==> **Installing python dependency: readline**

==> **Downloading https://homebrew.bintray.com/bottles/readline-7.0.3_1.yosemite.b**

100.0%

==> **Pouring readline-7.0.3_1.yosemite.bottle.tar.gz**

==> **Caveats**

This formula is keg-only, which means it was not symlinked into /usr/local,

because macOS provides the BSD libedit library, which shadows libreadline.

In order to prevent conflicts when programs look for libreadline we are

defaulting this GNU Readline installation to keg-only..

For compilers to find this software you may need to set:

    LDFLAGS: -L/usr/local/opt/readline/lib

    CPPFLAGS: -I/usr/local/opt/readline/include

==> **Summary**

🍺 /usr/local/Cellar/readline/7.0.3_1: 46 files, 1.5MB

==> **Installing python dependency: sqlite**

==> **Downloading https://homebrew.bintray.com/bottles/sqlite-3.20.1.yosemite.bott**

100.0%

==> **Pouring sqlite-3.20.1.yosemite.bottle.tar.gz**

==> **Caveats**

This formula is keg-only, which means it was not symlinked into /usr/local,

because macOS provides an older sqlite3.

If you need to have this software first in your PATH run:

  echo 'export PATH="/usr/local/opt/sqlite/bin:$PATH"' >> ~/.bash_profile

For compilers to find this software you may need to set:

  LDFLAGS: -L/usr/local/opt/sqlite/lib

  CPPFLAGS: -I/usr/local/opt/sqlite/include

For pkg-config to find this software you may need to set:

  PKG_CONFIG_PATH: /usr/local/opt/sqlite/lib/pkgconfig

==> **Summary**

🍺 /usr/local/Cellar/sqlite/3.20.1: 11 files, 3MB

==> **Installing python dependency: gdbm**

==> **Downloading https://homebrew.bintray.com/bottles/gdbm-1.13.yosemite.bottle.t**

100.0%

==> **Pouring gdbm-1.13.yosemite.bottle.tar.gz**

🍺 /usr/local/Cellar/gdbm/1.13: 19 files, 554.5KB

==> **Installing python dependency: openssl**

==> **Downloading https://homebrew.bintray.com/bottles/openssl-1.0.2l.yosemite.bot**

100.0%

==> **Pouring openssl-1.0.2l.yosemite.bottle.tar.gz**

==> **Caveats**

A CA file has been bootstrapped using certificates from the SystemRoots

keychain. To add additional certificates (e.g. the certificates added in

the System keychain), place .pem files in

 /usr/local/etc/openssl/certs

and run

 /usr/local/opt/openssl/bin/c_rehash

This formula is keg-only, which means it was not symlinked into /usr/local,

because Apple has deprecated use of OpenSSL in favor of its own TLS and crypto libraries.

If you need to have this software first in your PATH run:

  echo 'export PATH="/usr/local/opt/openssl/bin:$PATH"' >> ~/.bash_profile

For compilers to find this software you may need to set:

    LDFLAGS: -L/usr/local/opt/openssl/lib

    CPPFLAGS: -I/usr/local/opt/openssl/include

For pkg-config to find this software you may need to set:

    PKG_CONFIG_PATH: /usr/local/opt/openssl/lib/pkgconfig

==> **Summary**

🍺 /usr/local/Cellar/openssl/1.0.2l: 1,709 files, 12MB

==> **Installing python**

==> **Downloading https://www.python.org/ftp/python/2.7.14/Python-2.7.14.tar.xz**

100.0%

==> **./configure --prefix=/usr/local/Cellar/python/2.7.14 --enable-ipv6 --dataroo**

==> **make**

==> **make install PYTHONAPPSDIR=/usr/local/Cellar/python/2.7.14**

==> **make frameworkinstallextras PYTHONAPPSDIR=/usr/local/Cellar/python/2.7.14/sh**

==> **Downloading https://files.pythonhosted.org/packages/a4/c8/9a7a47f683d54d83f6**

100.0%

==> **Downloading https://files.pythonhosted.org/packages/11/b6/abcb525026a4be042b**

100.0%

==> **Downloading https://files.pythonhosted.org/packages/fa/b4/f9886517624a4dcb81**

100.0%

==> **/usr/local/Cellar/python/2.7.14/bin/python2 -s setup.py --no-user-cfg instal**

==> **/usr/local/Cellar/python/2.7.14/bin/python2 -s setup.py --no-user-cfg instal**

==> **/usr/local/Cellar/python/2.7.14/bin/python2 -s setup.py --no-user-cfg instal**

==> **Caveats**

This formula installs a python2 executable to /usr/local/bin.

If you wish to have this formula's python executable in your PATH then add

the following to ~/.bash_profile:

  export PATH="/usr/local/opt/python/libexec/bin:$PATH"

Pip and setuptools have been installed. To update them

  pip2 install --upgrade pip setuptools

You can install Python packages with

  pip2 install <package>

They will install into the site-package directory

 /usr/local/lib/python2.7/site-packages

See: https://docs.brew.sh/Homebrew-and-Python.html

==> **Summary**

🍺 /usr/local/Cellar/python/2.7.14: 6,344 files, 87.5MB, built in 2 minutes 35 seconds

Flask-User-05 (0.5)   - Customizable User Account

                        Management for Flask:

                        Register, Confirm email,

                        Login, Change username,

                        Change password, Forgot

password and more.

flask-restless-swagger-2 (0.0.3)   - Magically create swagger

documentation as you

magically create your RESTful

API

flask-restful-swagger-2 (0.35)   - Extract swagger specs from

your flask-restful project.

Project based on flask-

restful-swagger by Ran

Tavory.

3color-Press (0.2.1)   - A Flask based static site

generator for comics

flask-ab (0.0.1)   -

abilian-core (0.9.17)   - A framework for enterprise

applications (CRM, ERP,

collaboration...), based on

Flask and SQLAlchemy

AC-Flask-HipChat (0.2.12)   - Atlassian Connect library

based on Flask for HipChat

acceptable (0.9)   - API version negotiation for

flask-based web services.

Flask-Access (0.1)   - A Flask extension which

limits access to views.

Flask-Personal-Access-Token (0.1.2)   - Flask Personal Access Token

Management Extension

Flask-ACL (0.0.1)   - Access control lists for

Flask.

flask-miracle-acl (0.2)   - The fabric between the Flask

framework and Miracle ACL

Flask-Actions (0.6.6)   - custom actions for flask to

help manage your application

Flask-ActiveRecord (0.2.3)   - ActiveRecord support for

Flask-SQLAlchemy models

flask-ad-auth (0.1)   - Flask Azure Active Directory

Auth

fab-addon-audit (0.0.1)   - Audit functionality to flask-

appbuilder apps.

Flask-ADFS (0.1.6)   - User session management for

Flask

kore-plugins-flask-admin (0.0.1)   -

flaskpress-flask-admin (1.4.2.2)   - Fork of Flask-Admin for

flaskpress

flask-admin-barin (0.0.1)   - A Barin backend for Flask-

Admin

flask-admin-lite (0.1.0)   - Build lightweight admin panel

for your models

flask-admin-elasticsearch-dsl (0.0.1)   -

quokka-flask-admin (1.4.2.1)   - Fork of Flask-Admin for

QuokkaCMS

Flask-Admin-Utils (0.0.3)   - Utils for Flask-Admin

flask-admin-s3-upload (0.1.4)   - Field types for allowing file

and image uploads to Amazon

S3 (as well as default local

storage) in Flask-Admin.

flask-admin-openerp (0.3.3)   - OpenERP Backend for Flask-

Admin

Flask-Admin (1.5.0)   - Simple and extensible admin

interface framework for Flask

flask-admin.py (0.1.3)   - copy from djang-admin.py

Flask-Administration (0.1.42)   - UNKNOWN

afg (0.2)   - Alexa Flask Guide for Flask-

ASK

agaveflask (0.2.0)   - Common package for authoring

Agave services in flask

/Flask-RESTful

kolekti-agent-python-flask (0.0.1)   - Lightweight monitoring system

agent

burp-ui-agent (0.5.1)   - Burp-UI is a web-ui for burp

backup written in python with

Flask and jQuery/Bootstrap

Flask-Aggregator (0.2.0)   - Batch the GET requests to

your REST API into a single

POST

Flask-Airbrake (0.0.3)   - Flask extension for Airbrake

airbrake-flask (1.0.7)   - airbrake-flask - Airbrake

client for Python Flask

alchemist (0.3.12)   - A server architecture built

on top of a solid foundation

provided by flask,

sqlalchemy, and various

extensions.

flask-wtf-alchemy-utils (0.1.0)   - Form and field utility base

classes for use with Flask,

Flask-WTF, and wtforms-

alchemy.

Flask-Alchemy (0.1)   - The fastest markdown parser

in pure Python

flask-btsn-alchemy (0.0.2)   - BITSON's SQLAlchemy Models

flask-simple-alchemy (0.3.0)   - A Simplification of

SQLAlchemy's declarative

using Flask-SQLAlchemy

Flask-AlchemyDumps (0.0.10)   - SQLAlchemy backup/dump tool

for Flask

Flask-AlchemyView (0.1.4)   - Simple ModelView for auto-

generating Flask Views based

on SQLAlchemy models

Flask-Alchy (0.5.0)   - Flask extension for alchy

Flask-Alcool (0.3)   - Implement access control

lists as decorators for

flask.

Flask-Alembic (2.0.1)   - Flask extension to integrate

Alembic migrations

flask-allows (0.4)   - Impose authorization

requirements on Flask routes

Flask-Analytics (0.6.0)   - Analytics snippets generator

extension for the Flask

framework

Flask-And-Redis (0.7)   - Simple as dead support of

Redis database for Flask

apps.

andromeda (0.1.2)   - declarative, class-driven

framework written around

flask

Flask-Annex (0.4.2)   - Efficient integration of

external storage services for

Flask

just-another-settings (1.0)   - Small lib to manage settings

as object for

Flask/Bottle/custom apps

Flask-Api-Awesomesauce (0.1)   - Flask Api Awesomesauce!

rest-api-blueprint (0.1)   - Pedagogical blueprint of a

REST API in Flask.

Flask-Debug-API (0.1.0)   - API Browser for Flask-

DebugToolbar

Flask-API-Utils (1.0.2)   - Flask-API-Utils helps you to

create APIs.

api-star (0.1.4)   - An API framework for Flask &

Falcon.

flask-simple-api (1.4.1)   - Simple API endpoints for

Flask using Flask-Restful

reqparse and Python 3

annotations

Flask-API (1.0)   - Browsable web APIs for Flask.

li-api-flask (0.1.17)   - Loja Integrada's API Flask

Flask-API.yandex (0.6.2.1)   - Browsable web APIs for Flask.

apiaiwebhook (0.1.0.dev2)   - API.AI Webhook is a

fulfillment microframework

for API.AI based on Flask for

getting started quickly with

API.AI webhooks.

Flask-APIBlueprint (1.0.0)   - Route inheritance for Flask

Blueprints

flask-apidoc (1.1.1)   - Adds ApiDoc support to Flask

Flask-APIForm (1.0)   - A simple form validator for

REST APIs in Flask

flask-apify (0.7.1)   - A Flask extension to create

                        API to your application as a

                        ninja

apikit (0.3.2)   - A set of utility functions

                        for RESTful Flask

                        applications.

apispec-flask-restful (0.1)   - Flask-RESTful plugin for

                        apispec

flask-apispec (0.4.0)   - Build and document REST APIs

                        with Flask and apispec

flask-app-router (0.0.1)   - UNKNOWN

social-auth-app-flask-peewee (1.0.0)   - Python Social Authentication,

                        peewee Flask models

                        integration.

social-auth-app-flask-mongoengine (1.0.0)   - Python Social Authentication,

                        Mongoengine Flask models

                        integration.

social-auth-app-flask (1.0.0)   - Python Social Authentication,

                        Flask integration.

social-auth-app-flask-sqlalchemy (1.0.1)   - Python Social Authentication,

                        SQLAlchemy Flask models

                        integration.

create-flask-app (0.2.1)   - Create flask web apps with

                        directory layout

Flask-AppBuilder (1.9.4)   - Simple and rapid application

                        development framework, built

                        on top of Flask. includes

                        detailed security, auto CRUD

                        generation for your models,

google charts and much more.

Flask-Appcache (0.1.2)   - Semi-automagically sets up

appcache for you

flask-appconfig (0.11.1)   - Configures Flask applications

in a canonical way. Also

auto-configures Heroku. Aims

to standardize configuration.

Flask-AppFactory (0.2.1)   - Flask-AppFactory is an

dynamic application loader.

flask-apps (0.0.2)   - UNKNOWN

Flask-AppUtils (1.2.0)   - A collection of useful

patterns and helpers for

Flask applications

Flask-APScheduler-fork (1.5.4)   - Test package and a fork of

flask_apscheduler.

Flask-APScheduler (1.7.0)   - Adds APScheduler support to

Flask

apy (0.2.3)   - Pythonic API development with

flask

Flask-Arango (0.1.1)   - Flask extension providing

integration with Arango.

Flask-Arangodb (1.0.4)   - Flask extension for ArangoDB

using python-arango

archer (0.5)   - Thrift app the flask way

archerv2 (0.6)   - Thrift app the flask

way...The Right Way

Flask-Argon2 (0.1.2.1)   - Flask-Argon2 provides

convenient wrappers for

Argon2 password hashing

Flask-Argonaut (0.21)   - Flask extension use hashing

data with Argon2

flask-request-args-parser (1.1.0)   - flask.request's args parser

flask-args (0.3.0)   - auto type convertion for flas

k.request.form/args/values

Flask-arrest (0.5.0)   - A small Flask extension to

ease the creation of REST

apis.

arrested (0.1.0.dev3)   - A framework for rapidly

building REST APIs in Flask.

Flask-Ask (0.9.7)   - Rapid Alexa Skills Kit

Development for Amazon Echo

Devices in Python

Flask-Aspen (0.0)   - UNKNOWN

assentio (0.1)   - A minimal, lightweight flask-

based blog

Flask-AssetRev (1.0.0)   - UNKNOWN

Flask-Assets (0.12)   - Asset management for Flask,

to compress and merge CSS and

Javascript files.

Flask-Assistant (0.2.93)   - Framework for Building

Virtual Assistants with

API.AI

selenium-astride (0.2.2)   - Framework to use Selenium

loud and clear, astride. Use

it with Django, Flask or your

favourite web framework.

Flask-Async (0.11-dev-20140215)   - A fork of Flask to support

asyncio

atilla (1.2.6)   - flask API projects helper

Flask-AtlassianConnect (0.0.5)   - Atlassian Connect Helper

Flask-Attest (0.1dev)   - Test Flask applications with

Attest

Flask-Augment (0.5)   - Python decorators

implementing contracts for

flask framework

flask-modular-auth (0.2)   -

flask-social-auth (0.0)   -

flask-wechat-auth (0.0.1)   - WeChat Flask Blueprint Module

pixelpin-auth-flask (1.0.0)   - Python Social Authentication,

Flask integration.

pixelpin-auth-flask-sqlalchemy (1.0.1)   - Python Social Authentication,

SQLAlchemy Flask models

integration.

Flask-Auth (0.85)   - Auth extension for Flask.

Flask-Heroku-Auth (0.0.5)   - Flask Based Heroku

Authentication.

Flask-Authbone (0.3)   - Plugguble Auth framework for

Flask.

flask-authjwt (0.1.1)   - Module to secure flask

endpoints in appengine using

jwt token.

Flask-Authority (0.0.1)   -

Flask-Authorization-Panda (0.3)   - Flask Authorization for

Pandas!

Flask-Restful-Autodoc (0.0.1.1)   - Simple library for auto

generating documentation for

Flask-Restful package

Flask-Autodoc (0.1.2)   - Documentation generator for

flask

Flask-AutoFixture (0.2.3)   - Flask extension for recording

JSON fixtures right from your

test suite

Flask-AutoIndex (0.6)   - The mod_autoindex for Flask

flask-automation (1.1)   - Common functionality across

the different Flask

microservices of the UofC UIS

Automation team

flask-autorouter (0.2.1)   - a utility for generating

flask URL routing

Flask-Avatar (0.1.2)   - To generate avatar for flask

Flask-Avatars (1.0)   - All avatar generators in one

place.

flask-avro (0.0.1)   - Simple AVRO IPC endpoint

registration for Flask

flask-awesomemongokit (0.3.3)   - Sets up an extremely

opinionated MongoKit

environment in Flask, based

selfishly on my own needs.

Flask-AYAH (0.1)   - Are you a Human? Flask

Extension

Flask-Azure-Storage (0.2.1)   - Flask extension that provides

integration with Azure

Storage

Flask-Imagine-AzureAdapter (0.4)   - Microsoft Azure BLOB adapter

for Flask-Imagine extension.

Flask-B1Connector (0.0.1)   - Use to connect SAP B1 RESTful

API

API.

Flask-B3 (0.0.4)   - B3 header access and
propagation for Flask.

flask-babel-utclocal-utils (0.1.0)   - UTC to local (and vice versa)
datetime conversion utilities
for use with Flask-Babel.

Flask-Babel (0.11.2)   - Adds i18n/l10n support to
Flask applications

Flask-Babel2 (0.1)   - Adds i18n/l10n support to
Flask applications

Flask-Babeled (0.9.3)   - Adds i18n/l10n support to
Flask applications

Flask-BabelEx (0.9.3)   - Adds i18n/l10n support to
Flask applications

Flask-BabelPkg (0.9.6)   - Adds i18n/l10n support to
Flask applications and
extensions

Flask-BabelPlus (2.1.0)   - Adds i18n/l10n support to
Flask applications

Barista (0.0.22)   - A Flask application creator

Flask-BasicAuth (0.2.0)   - HTTP basic access
authentication for Flask.

Flask-HAL-BBVA (1.0.5)   - Provides easy integration of
the HAL specification for
your REST Flask Applications.

Flask-Bcrypt (0.7.1)   - Brcrypt hashing for Flask.

Flask-BCS (0.9.1)   - Baidu Cloud Storage for Flask

Flask-BDEA (0.1.0)   - Flask-BDEA

Flask-Beaker (0.2.0)   - Beaker session interface for
Flask.

Flask.

flask-beans (1.2)   - A simple API for counting

beans with Flask and Redis.

Flask-Beanstalk (0.0.3)   - Utilities for using Beanstalk

with Flask

Flask-BearyChat (0.2.0)   - A Flask extension to help

interact with BearyChat

behave-models-steps (0.1.6)   - Provides testing for Flask-

SQLAlchemy models with Behave

flask-bigtempo (0.8)   - Flask extension for bigtempo

features

Flask-bitjws (0.1.1.5)   - A Flask extension for bitjws

authentication.

Flask-Bitmapist (0.1.2)   - Flask extension that creates

a simple interface to

Bitmapist analytics library

biweeklybudget (0.4.0)   - Responsive Flask/SQLAlchemy

personal finance app,

specifically for biweekly

budgeting.

Flask-Bleach (0.0.2)   - Easy integration of bleach

flask-blitzdb (0.1)   - Flask extension for blitzdb

flask-block (0.0.1)   -

flask-blocks (1.0.9)   - The common blocks which solve

common problems encountered

when creating Flask

applications.

blocky (0.0.2)   - Block rendering for flask and

django using jinja2.

Blogging-Plugins (0.2.0)   - A plugin library for Flask-

Blogging-Plugins (0.2.0)   - A plugin library for Flask-

Blogging flask extension

blog.

Flask-Blogging (1.0.2)   - A flask extension for adding

Markdown blog support to your

site

Flask-BlogTheme (0.2.2)   - Flask extension to read

switch theme easily

Bluebook (0.0.1)   - Pylot is a Flask extension

that adds structure and map

your views and templates

together for rapid

application development

blueflask (0.1.4)   - Flask boilerplate to create

an application with the idea

of pluggable blueprints.

flask-bluelogin (0.2.7)   - Flask BlueLogin module

flask-social-blueprint (0.7.2)   - An OAuth based authentication

blueprint for flask. Easy to

extend and override

flask-bluestatic (0.1.0)   - Flask BlueStatic module

flask-boilerplate-utils (0.1.65)   - Additional functionality with

easy upgrading for the flask-

boilerplate.

Flask-Turbo-Boost (0.0.10)   - Forked Flask-Boost - Flask

application generator for

boosting your development.

Flask-Boost (0.7.5)   - Flask application generator

for boosting your

development.

development.

Flask-SQLAlchemy-Booster (0.4.109)   - Querying and JSON Response

generation wrappers for

Flask-SQLAlchemy

BootFlask (0.1)   - A simple tool for turn your

flask projects more quick and

fun.

Flask-Bootstrap (3.3.7.1)   - An extension that includes

Bootstrap in your project,

without any boilerplate code.

Flask-Bootstrap3 (3.1.1.3)   - UNKNOWN

Flask-Bootstraps (3.3.7.8)   - An extension that includes

Bootstrap in your project,

without any boilerplate code.

bootstraps (1.0.1)   - A library to handle user

related tasks in Flask

Facebook-Bot-Library (0.1)   - A facebook messaging SDK for

Flask

Flask-Boto3 (0.2.2)   - Flask extension that ties

boto3 to the application

Flask-BotoSQS (0.2.0)   - Boto3 SQS integration for

Flask

zulip-botserver (0.3.4)   - Zulip's Flask server for

running bots

flask-bouncer (0.1.13)   - Flask Simple Declarative

Authentication based on Ryan

Bates excellent cancan

library

Flask-S3-Bower (0.7)   - Seamlessly serve the static

files of your Flask app from

files of your Flask app from

Amazon S3 and also use bower

for development

Flask-Bower (1.3.0)   - An extension to manage and

serve your javascript assets

with bower

Flask-BowerCDN (0.1.0)   - Work easily with Bower and

CDN content.

Flask-SSLify-bp (0.1.6)   - Force SSL on your Flask app.

flask-shell-bpython (0.0.1)   - Replace the default `flask

shell` command with a similar

command running BPython.

flask-braintree (0.01)   -

Flask-Breadcrumbs (0.4.0)   - Flask-Breadcrumbs adds

support for generating site

breadcrumb navigation.

Flask-Breathalyzer (0.2.2)   - Flask module for submitting

timings and exceptions to

Datadog

Flask-Breve (0.2)   - Breve templating with Flask

Flask-Bridgekeeper (0.1.1)   - Manage the access control of

a flask application

Broadway-Migrate (0.0.1)   - A set of tools to reduce the

boilerplate code in Flask

apps

Broadway-SQLAlchemy (0.0.1)   - A broadway extension wrapping

Flask-SQLAlchemy

Broadway (0.0.2)   - A set of extensions for Flask

that take the boilerplate out

of your project.

of your project.

Flask-outdated-browser (0.1)   - Easily add outdated-browser
                                     project to your Flask
                                     application

browser-markdown-editor (0.2.0)   - Markdown editor for web
                                     browsers, built with Flask.

Flask-BrowserID (0.0.4)   - Flask support for BrowserID
                                     authentication

Flask-BS (0.5.5)   - Another flask extension that
                                     provides Bootstrap CSS, JS
                                     and HTML5 boilerplate.

Flask-BSON (0.1.1)   - Let your flask endpoints
                                     handle BSON requests and
                                     responses

buchner (0.1.dev)   - Flask project template and
                                     helper library

flask-buckets (0.1.dev)   - Simple and easy file storages
                                     for Flask

bugsnag (3.2.0)   - Automatic error monitoring
                                     for django, flask, etc.

buildbot-wsgi-dashboards (0.9.11)   - Buildbot plugin to integrate
                                     flask or bottle dashboards to
                                     buildbot UI

Flask-Bulbs (0.1)   - Flask extension for
                                     [Bulbs](http://bulbflow.com/)
                                     supporting the factory
                                     pattern with the init_app
                                     method.

flask-bundle-system (0.1)   - Flask extension for work with
                                     blueprints as bundles

Flask-Bundle (0.4)   - Class based tool that behaves

like blueprints

flask-static-bundle (0.1.3)   - Flask extension for static-

bundle

flask-graylog-bundle (0.0.11)   - Flask Graylog client

Buro (0.1.27)   - A very simple Python-powered

open-source web framework

inspired by Flask, but

following different design

decisions

burp-ui (0.5.1)   - Burp-UI is a web-ui for burp

backup written in python with

Flask and jQuery/Bootstrap

http-butler (0.4.0)   - Light flask server

Flask-Cache-PyLibMC (0.1)   - PyLibMC cache for Flask-

Cache, supports multiple

operations and other awesome

things.

Flask-Cache-Latest (0.12)   - Adds cache support to your

Flask application

Flask-Cache-Redis-Cluster (0.0.5)   - Adds redis cluster caching

support to the Flask

Cache(ing) extension

Flask-SQLAlchemy-Cache (0.1.5)   - CachingQuery implementation

to Flask using Flask-

SQLAlchemy and Flask-Cache

Flask-Cache-Cassandra (0.14.6)   - Adds cache support to your

Flask application

Flask-Dogpile-Cache (0.2)   - Adds dogpile.cache support to

your Flask application

Flask-Cache (0.13.1)   - Adds cache support to your

Flask application

Flask-CacheControl (0.1.2)   - Set Cache-Control headers on

the Flask response

Flask-Heroku-Cacheify (1.6.0)   - Automatic Flask cache

configuration on Heroku.

Flask-CacheOBJ (0.2.2)   - Flask-CacheOBJ provides some

caching decorators

Flask-SQLAlchemy-Caching (1.0.1)   - CachingQuery implementation

to Flask using Flask-

SQLAlchemy and Flask-Caching

Flask-Caching (1.3.2)   - Adds caching support to your

Flask application

Flask-Cachual (0.2.0)   - Flask extension for the

Cachual library

Flask-Cake (0.3.1)   - Flask extension to execute

Cake on filesystem events.

Flask-Canonical (0.1.1)   - Easy canonical logging for

Flask

flask-canvas (0.1)   - A Flask extension for

Facebook canvas-based apps

capitains-hook (1.0.0)   - Hook Flask App for Github/CTS

repositories

Flask-Captain (0.1.1)   - Handle webhooks with Flask

flask-session-captcha (1.1.0)   - Captcha implementation for

flask and flask-session.

Flask-Captcha (0.1.8)   - A very simple, yet powerful,

Flask captcha extension

carafe (0.4.7)   - Collection of Flask

extensions geared towards

JSON APIs

cartographer (0.2.0-alpha5)   - Python library for using JSON

API, especially with Flask.

Flask-CAS (1.0.1)   - Flask extension for CAS

Flask-Cassandra (0.14)   - Provides a connection to a

Cassandra cluster in a Flask

app

cassandra_flask_sessions (0.3)   - Server side sessions with

Apache Cassandra

Flask-CassandraDB (0.0.1)   - connect cassandra to flask

Flask-Caster (0.1.0)   - A simple Flask extension for

automatically casting the

type of query arguments.

castle-flask (0.0.1)   - A Flask client for Castle.io

Flask-Cavage (0.4.3)   - Verify cavage-http-signatures

requests made to Flask

flask-cbv (0.0.1)   - Class based views for Flask.

Flask-CDN-NG (1.3.0)   - Serve the static files in

your Flask app from a CDN.

Flask-CDN (1.5.3)   - Serve the static files in

your Flask app from a CDN.

Flask-Celery-Helper (1.1.0)   - Celery support for Flask

without breaking PyCharm

inspections.

Flask-Celery (2.4.3)   - Celery integration for Flask

Flask-Celery-py3 (0.2.4)   - Celery 3.0+ integration for

Flask (Python 3 version)

Flask-Celery3 (0.2)   - Add Celery3 integration to
your Flask apps.

Flask-CeleryExt (0.3.0)   - Flask-CeleryExt is a simple
integration layer between
Celery and Flask.

Flask-Cent (0.1.3)   - centrifugal/cent client for
flask

centralsession (0.3.0)   - A redis based session storage
that works for flask and
django

Flask-Multipass-LDAP-CERN (1.0.3)   - CERN-specific Flask-Multipass
providers

python-cfworker (1.6.0)   - This module makes it easier
to deploy Python workers by
wrapping Flask and
multiprocess functionality
into a single module. When
instanced, your app will be
serving http via Flask, as
well as performing work.

Flask-Chargebee (0.0.1)   - Flask-Chargebee

cheddar (1.4)   - PyPI clone with Flask and
Redis

chiki (1.1.1)   - Common libs of flask web
develop

chill (0.3.3)   - Database driven web
application framework in

Flask

Flask-Church (0.0.1)   - Flask-Church is a extension

for Flask that help you
generate fake data for
testing

Flask-CI (1.2.9.1)   - Continuous Integration
support for Flask

Flask-CKEditor (0.2)   - Implementation of CKEditor
for WTForms/Flask-WTF.

flask-clacks (1.0.1)   - A man is not dead while his
name is still spoken.

Flask-Classful (0.13.1)   - Class based views for Flask

Flask-Classy (0.6.10)   - Class based views for Flask

clay-flask (2.1.8)   - Clay is a framework for
building RESTful backend
services using best
practices.

Flask-Clearbit (0.1.0)   - Flask-Clearbit

Flask-CLI (0.4.0)   - Backport of Flask 1.0 new
click integration.

Flask-Click-Migrate (0.1.0)   - A library to glue flask +
alembic + click

flask-test-requests-client (0.2.0)   - A Flask test client which
replicates the requests
interface.

platformo-client (0.0.1)   - 收集Flask的请求响应时间并发送至logstash

Potion-client (2.5.1)   - A client for APIs written in
Flask-Potion

klue-client-server (1.0.119)   - Swagger + Flask + Bravado =

Client/Server auto-spawning

Flask-Cloudy (1.0.1)   - Flask-Cloudy is a simple

flask extension and
standalone library to upload
and save files on S3, Google
storage or other Cloud
Storages

Flask-CMDB (0.1.4)   - A cmdb api client for Flask
applications.

Flask-CMS (0.0.1)   - Extensible Content Management
System for Flask: Pages,
Blogs, Comments and more.

Flask-CMS-Core (0.01)   -

coaster (0.6.0)   - Coaster for Flask

Flask-Swagger-Codegen (0.0.6)   - Generate Flask code from
Swagger docs.

swagger-py-codegen (0.2.9)   - Generate Flask code from
Swagger docs.

flask-codemirror (1.0)   - Use CodeMirror Javascript
library with Flask-WTF

Flask-Coffee (0.3)   - Fill your flask with coffee.

flask-coffee2js (0.1.2)   - A small Flask extension that
adds CoffeScript support to
Flask.

Flask-Collect (1.3.2)   - Flask-Collect -- Collect
static files in Flask
application

Flask-Color (0.2.1)   - flask-color is an extension
for Flask that improves the

built-in web server with
colors when debugging.

Unnecessary clutter such as
time or IP are hidden.

flask-command (0.0.3)   - flask-command - Run you
flask+gunicorn app as a
command

Flask-Common (0.2.0)   - A Flask extension with lots
of common time-savers (file-
serving, favicons, etc).

Flask-Compass (0.2)   - Adds automatic Compass
compilation to Flask

Flask-Components (0.1.1)   - A simple flask extension to
discover files in a declared
array of components.

Flask-Composer (0.4.1)   - Composite Web UI extension
for Flask

Flask-Compress-nondebug (1.0.2)   - Compress responses in your
Flask app with gzip.

Flask-Static-Compress (1.0.1)   - Auto-detects your static
files for minification,
combination, and versioning.
Like Django-Compressor for
Flask.

Flask-Compress (1.4.0)   - Compress responses in your
Flask app with gzip.

Flask-Compressor (0.2.0)   - Compress your CSS and JS
files.

flask-conditional (0.1)   - Conditional decorators for

Flask routes

Flask-Config-Helper (0.1.1)   - Flask configuration helper

Flask-Config-Override (0.0.2)   - Override Flask configuration
                                       via Cookie at runtime.

Flask-Config (0.2.1)   - Flask configuration class

flask-confighelper (1.0.0)   - Helper for setting up
                                       environment configurations

flask-pre-configured-loggers (0.1.1)   - Flask request / script pre-
                                       configured loggers.

Congo (0.0.1)   - Portfolio is a Flask based
                                       framework that adds structure
                                       and map your views and
                                       templates together for rapid
                                       application development

conmongo (0.0.2)   - A Flask microplugin based on
                                       pymongo

connexion (1.1.15)   - Connexion - API first
                                       applications with
                                       OpenAPI/Swagger and Flask

flask-consulate (0.2.0)   - flask extension that provides
                                       an interface to consul via a
                                       flask app

Container-WhooshAlchemyPlus (0.7.5.post3)   - Whoosh extension to
                                       Flask/SQLAlchemy which used
                                       in sina container

Flask-Context (0.1)   - Provide an arbitrary context
                                       object to Flask. Useful for
                                       microservice environments.

Flask-REST-Controller (1.0.0)   - Flask-REST-Controller is

                                       added Class-Based-
                                       View(Controller) extension on

Flask

hepdata-converter-ws (0.1.6)   - Flask webservices enabling

usage of hepdata-converter as

a separate server over the

network

flask-secure-cookie (0.1.2)   - Tornado's secure cookie

support in Flask

flask-extension-cookiecutter (0.1.1)   - Cookiecutter template for a

Flask Extension

Flask-Copilot (0.2.0)   - Simple navbar generation for

Flask applications.

Flask-Coralillo (0.1.2)   - Flask module for the

Coralillo redis ORM

corkscrew (0.18)   - ooviews, settings, auth &

more for flask

Sanic-Cors (0.6.0.2)   - A Sanic extension adding a

decorator for CORS support.

Based on flask-cors by Cory

Dolphin.

Flask-Cors (3.0.3)   - A Flask extension adding a

decorator for CORS support

Flask-CORSify (0.1.1)   - Add CORS support for your

Flask app.

Flask-COS (0.1.0)   - 腾讯云对象存储的Flask扩展

Flask-CouchDB-Schematics (1.0.0)   - Provides utilities for using

CouchDB + Schematics with

Flask

Flask-CouchDB (0.2.1)   - Provides utilities for using

CouchDB with Flask

Flask-CouchDBKit (0.3.5)   - Flask extension that provides

integration with CouchDBKit.

Flask-CQLAlchemy (1.2.0)   - Flask-CQLAlchemy handles

connections to Cassandra

clusters and provides an

interface through cqlengine

hero-crawl (0.1.4)   - Helpers for Scrapy and Flask

on Heroku

Flask-Creole (0.4.4)   - Creole parser filters for

Flask

flask-crossdomain (0.1)   - HTTP Access Control helper.

Flask-Crossdomain2 (0.1.0)   - Module for enabling cross-

site/cross-origin HTTP

requests on Flask app

endpoints.

Flask-SQLAlchemy-CRUD-Mixin (0)   -

Flask-Crud (0.0.2)   - Quick and Easy CRUD for

Flask, built on top of Flask-

Classy

crumby (0.7.1)   - A Flask based web analytics

app

flask-csp (0.9)   - Flask Content Security Policy

header support

flask-csrf (0.9.2)   - A small Flask extension for

adding CSRF protection.

Flask-CSV (1.0.1)   - Easily render CSVs within any

flask application

CTRegisterMicroserviceFlask (0.3.1)   - Library to interact with the

Control-Tower api-gateway

(register, do requests to
other microservices, etc)

flask-ctx (1.0.0)   - A simple integration of the
CTX defense against side-
channel attacks for Flask
projects.

Flask-CuddlyRest (0.1.15)   - Flask restful API framework
for MongoDB/MongoEngine

flask-daapserver (3.0.2)   - DAAP server framework
implemented with Flask

Flask-Dance (0.11.1)   - Doing the OAuth dance with
style using Flask, requests,
and oauthlib

flask-monitoring-dashboard (1.8)   - A dashboard for automatic
monitoring of python web-
services

Flask-Dashboard (0.0.6a)   - Yet another admin interface
for Flask

Flask-Dashed (0.1b2)   - Adds a way to easily build
admin apps

Flask-Datadog (0.1.4)   - Access to dogstatsd in your
app.

Flask-DB2 (0.0.10)   - Creates connections for use
with DB2

Flask-DBConfig (0.3.12)   - Configure Flask applications
from a local DB

Flask-DBKit (0.0.1)   - dbkit integration for Flask.

Flask-DBMigrate (0.1)   - Database schema change
management for

Flask\SQLAlchemy

Flask-DbShell (1.0)   - Django-like dbshell

Flask-Debug (0.4.3)   - Shows

reflection/configuration to

aid the development of Flask

applications.

flask-debugtb-elasticsearch (0.1.3)   - Flask debug toolbar panel for

elasticsearch queries.

Flask-DebugTool (0.1.8)   - A toolbar overlay for

debugging Flask applications.

Flask-DebugToolbar-Mongo (0.1)   - MongoDB panel for the Flask

Debug Toolbar

Flask-DebugToolbar-LineProfilerPanel (1.0.2)   - Panel for the Flask Debug

toolbar to capture and view

line-by-line profiling stats

Flask-DebugToolbar (0.10.1)   - A toolbar overlay for

debugging Flask applications.

Flask-Decorators (0.0.1)   - A list of Flask decorator

utilitiesnot include in the

origin flask project.

Flask-Defer (1.1.0)   - Flask extension to defer task

execution under after request

teardown

Flask-Devices (0.0.1)   - Flask extension for switching

template folder automatically

by User Agent

flask-oauth2-devices (0.0.1)   - OAuth2 for devices flow

implementation for Flask

Flask-Diamond (0.5.1)   - Flask-Diamond provides some

opinions about data-centric Internet applications and systems. Flask-Diamond is a batteries-included Flask framework, sortof like Django but radically decomposable.

Flask-Diced (0.3)   - Flask-Diced - CRUD views generator for Flask

Flask-Digest (0.2.1)   - A RESTful authentication service for Flask applications

flask-discoverer (0.0.2)   - Flask API autodiscovery

Flask-Disqus (0.0.1)   - Small extension for Flask to make possible using Disqus comments

Flask-Dissect (1.0.10)   - Dissect Distributed Session Control

Djam (0.9.8)   - Extends Django to work with sqlalchemy and make it behave like Flask

sqlalchemy-django (0.0.3)   - similar flask sqlalchemy

django-fsu (0.1.2)   - Flask-Style URL Patterns for Django

django-kungfu (0.2)   - A Flasky approach to distributed Django configuration

Flask-DjangoQuery (0.2.4)   - Django like query for Flask-SQLAlchemy

flask-djcelery (0.1)   - An integration of djcelery

with flask application

djeasyroute (0.0.2)   - A simple class based route

system for django similar to

flask

djroute (1.1)   - Flask inspired dynamic

routing for Django

Flask-Dmango (0.0.7)   - Contents managements support

for Flask + MongoDB

applications

ums-doc-swag (1.0.1)   - Extract swagger specs from

your flask project

ums-doc-swagger (1.0.1)   - Extract swagger specs from

your flask project

doc-swag (1.0.1)   - Extract swagger specs from

your flask project

flask-docjson (0.1.7)   - Validate flask request and

response json schemas via

docstring.

Flask-Docker (0.2.0)   - Using Docker client in your

Flask application.

doctor (1.3.2)   - A module that assists in

using JSON schemas to

validate data in Flask APIs

and generate API

documentation.

Flask-DogStatsd (0.5.0)   - A Flask extension for

dogstatsd-python

pylot-dojo (0.1.0)   - MVC framework build on top of

flask

Flask-Sitemap-Domain (0.2.4)   - Flask extension that helps

with sitemap generation.

Flask-DotEnv (0.1.1)   - The .env file support for

Flask

python-dotenv (0.7.1)   - Add .env support to your

django/flask apps in

development and deployments

webshare-download-manager (0.2.6)   - Download manager for

webshare.cz site. Flask +

requests.

Flask-Downloader (0.2)   - Allow a Flask web app to

download files on behalf of

the user.

draftin_a_flask (0.1.5)   - A simple Flask server that

allows you to publish Pelican

blags from http://draftin.com

Flask-Dropbox (0.3)   - Dropbox Python SDK support

for Flask applications.

Flask-DropIn (0.0.1)   - Flask-DropIn let you easily

organize large flask project.

Flask-Dropzone (1.4)   - Upload file in Flask with

Dropzone.js.

Flask-Dry-Transaction (0.1.0)   - A python package implementing

the strategy of business

transaction in flask

microservices developement

Flask-RESTful-DRY (0.3.1)   - Flask-RESTful APIs using

declarations, not code

dscsrf (1.0)   - Double-submit CSRF protection

for Flask applications.

Flask-Should-DSL (0.4)   - A flask extension for testing with should-dsl

Flask-DStore (0.1.2)   - DStore Web API and JS Client using FLask

Flask-DWConnector (0.0.1)   - Use to connect DataWald RESTful API.

flask-dynamo-session (0.0.3)   - Flask extension for storing session in dynamodb. Uses flask_dynamo.

flask-dynamo (0.1.2)   - DynamoDB integration for Flask.

flask-east (1.0.0)   - Flask extension for creating REST APIs

flask-easy-model (0.4.0)   - A great base model, bringing Django conveniences to Flask

Python-EasyConfig (0.1.6)   - A simple library for loading configurations easily in Python, inspired by `flask.config`.

easyflask (0.0.2)   - Flask project generator

easyforms (0.0.16)   - Form processing library for Flask and Jinja2

flask-easymode (0.0.17)   - Make Flask development even easier

ecstatic (0.4)   - A small flask application to serve files.

Flask-Ecstatic (0.3.0)   - Serves static files with optional directory index

Flask-Edits (0.8)   - Editable Content in Flask

Flask-Elastic (0.2)   - Integrates official client

                                     for Elasticsearch into Flask

Flask-Elasticsearch (0.2.5)   - Flask extension for

                                     Elasticsearch integration

Flask-ElasticUtils (0.1.7)   - ElasticUtils for Flask

Eliza (1.0.0)   - Library with common features

                                     for Python (Flask)

                                     Microservices

elsa (0.1.3)   - Helper module for Frozen-

                                     Flask based websites

Flask-Security-Elucidata (1.0.0)   - Simple security for Flask

                                     apps.

Flask-Email (1.4.4)   - Flask extension for sending

                                     email

flask-emails (0.4)   - Elegant and simple email

                                     library for Flask.

flask-jsonify-emidln (0.1)   - A small Flask decorator for

                                     returning json. This is a

                                     fork pushed to PyPI for easy

                                     install.

flask-phantom-emoji (0.1.4)   - Add phantom emoji's to your

                                     flask application

Empty (0.4.2)   - Wrapper which makes Flask

                                     development easier

Flask-MIME-Encoders (0.1.3)   - Extensible Flask MIME

                                     encoders and decoders

flask-endpoint (0.1)   -

Flask-Enterprise (1.0)   - Enterprise capabilities for

Flask

flask-env-settings (0.1.0)   - Load application settings
from env variables

Flask-Env (1.0.1)   - Easily set Flask settings
from environment variables

Flask-Heroku-Env (0.0.4)   - Easily fetch Heroku
environment variables.

Flask-EnvConfig (0.2.0)   - Configure Flask from
environment variables.

Flask-Environ (0)   - os.environ wrapper for flask
config

Flask-Environment (0.3.1)   - Configure a Flask application
with various file formats.

Flask-Environments (0.1)   - Environment tools and
configuration for Flask
applications

Erlenmeyer (0.2.4)   - Automatically generate Flask
servers from Core Data.

flask-erppeek (1.0.1)   - ERPPeek Connector for Flask

Flask-ErrorHandler (0.1.0)   - Generic error handlers for
Flask blueprints.

Flask-ErrorMail (0.2.2)   - Flask extension for sending
administrators e-mails with
stacktraces when internal
server errors occur.

Flask-ESClient (0.1.1)   - Flask extension for ESClient
(elasticsearch client)

Flask-Espresso (0.2.0)   - Adds Coffescript support to
Flask applications

espressocup (0.0.3)   - A gevent-intended very very

basic flask-like WSGI server

Eve-SQLAlchemy (0.4.1)   - REST API framework powered by

Flask, SQLAlchemy and good

intentions.

eventum (0.2.7)   - A content management system

for event-driven Flask apps

evernode (0.2.0)   - EverNode is built by

expanding upon flask by

adding great features and

easy-to-use modular design.

Flask-Evolution (0.6)   - Simple migrations for

Flask/SQLAlchemy projects

Flask-Excel (0.0.7)   - A flask extension that

provides one application

programming interface to read

and write data in different

excel file formats

flask-script-exception-handler (0.1.1)   - Exception handler designed

mainly to handle errors in a

flask-script custom command.

Flask-Exceptional (0.5.4)   - Adds Exceptional support to

Flask applications

Flask-Pypi-Proxy-Ext (0.5.1)   - A Pypi proxy

tradenity-flask-ext (0.1.0)   - Flask framework extensions

for Tradenity Python SDK.

Flask-JSONSchema-Ext (0.1.2)   - Flask JSONSchema Extended

Library

Flask-Statsd-Ext (0.0.3)   - Statsd Extension for Flask

invenio-ext (0.3.2)   - Invenio module that provides

integration with Flask

extensions.

Flask-ExtDirect (0.2)   - Adds Ext.Direct support to

Flask.

Flask-RESTful-extend (0.3.7)   - Improve Flask-RESTFul's

behavior. Add some new

features.

Flask-JWT-Extended (3.3.1)   - Extended JWT integration with

Flask

Flask-Extension (1.0)   - Demo for flask extension.

Flask-Logging-Extras (0.1.0)   - Extra logging functionality

for Flask apps

eyeflask (0.1.3)   - Flask-based EyeFi Server

Flask-Factory (0.1.0dev)   - Provide a general-purpose

application factory of the

Flask application, and the

configurator that is

independent of the app

object.

fah (0.1.0)   - Flask Against Humanity

(copyright infringement

pending).

Flask-Failsafe (0.2)   - A failsafe for the Flask

reloader

fannypack (0.0.4)   - a set of utilities for flask

Flask-Fanstatic (0.2.0)   - Flask integration for the

Fanstatic resource publishing

system.

Flask-FAS (0.1.0)   - Adds Fedora Account System

support to Flask

Flask-FastRPC (1.5)   - Flask extension for

FastRPC/XMLRPC server

fawn (2.1.1)   - flask async uwsgi websocket

postgresql notify

Flask-FBLogin (0.0.1)   - Extends Flask-Login to use

Facebook's OAuth2

authorization

fbones (0.0.5)   - A bootstrap toolkit to

kickoff a flask project

Flask-FCM (0.1)   - Flask Extension for using

Firebase Cloud Messaging

service

Flask-FDS (0.0.6)   - Xiaomi File Storage Service

for Flask

fdt-sqlalchemy (0.0.4)   - Flask-debugtoolbar

configurable SQLAlchemy panel

Flask-FeatureFlags (0.6)   - Enable or disable features in

Flask apps based on

configuration

Flask-FedoraCommons (0.0.8)   - Library for manipulating

Fedora Commons digitial

repositories

feiwu (0.0.3)   - some useful module on flask

developer

FejsaFlaskProject (1.0)   - UNKNOWN

flask-ffs (0.3.0)   - A Flask library for the

storage and retrieval of

images on the file system.

Flask-FIDO-U2F (0.4.4) - A Flask plugin that adds FIDO U2F support.

Flask-RESTful-Fieldsets (0.1.0) - Extension to Flask-RESTful to create fieldsets

Fifty-Flask (1.2.0) - Flask enhancements.

fighting (0.1.0) - A simple JSON API web framework based on Flask

Flask-FileRev (0.1.0) - Flask-FileRev

Flask-FileUpload (0.5.0) - Flask-FileUpload is a Flask extension for easy file upload and management

Flask-fillin (0.2) - A flask extension that provides utilities to test forms.

Flask-Filtered-Response (1.0.2) - Add filter capability to JSON responses

flask-filters (0.3) - The Flask Filter to use with flask-restful and Relational DB

finny (0.3.10) - Finny is the act of being skinny and fat at the same time. Basic structure for an api-centry approach to Flask - that is both fat in skinny, with basic and augmented support over some popular Flask libs

fireflask (0.2.0)   - Simple, beautiful logging
from Flask web apps to
FireBug console

fis3 (0.0.8)   - 扩展flask,支持fis3

Flask-Fixtures (0.3.7)   - A simple library for adding
database fixtures for unit
tests using nothing but JSON
or YAML.

fl-static (0.0.2)   - Serve production static files
with Flask.

fl-flask-zipkin (0.0.6)   - An zipkin extension for Flask
based on py_zipkin.

Flask-Flacro (0.0.8)   - flask/jinja2 templating tools

flactory (0.2.0)   - A handy tool for creating and
initializing flask
applications

flagen (0.1)   - A flask static site generator
that uses markdown and jinja2
templates.

flamyngo (0.9.2)   - Flamyngo is a customizable
Flask frontend for MongoDB.

flango (0.0.1)   - Flask-like interface for
Django

Flask-Flarf (0.0.5)   - Flask request filtering

flasgger (0.7.0)   - Extract swagger specs from
your flask project

Flask-Flash (1.6.2)   - Flask API framework (API +

Client) to create simple APIs
from database models.

Flask-Forward (0.1.0)   - Flask-Forward extension

Flask-Forward (0.1.0)   - Flask-Forward extension

provides auto discovery,

prioritization and rendering

of template for Flask based

on endpoint

Flask-GripControl (0.0.1)   - Flask GripControl

Flask-Humanoid (1.0)   - Common humanization utilities

for Flask applications.

flask-iMail (0.1)   - Mailgun integration for

Flask.

Flask-Imgur (0.1)   - Upload images straight to

Imgur in your Flask app

Flask-kale (0.1)   - Use kale models on a flask

project

Flask-Librato (0.0.1)   -

Flask-Lock (0.0.1)   -

Flask-Mage2Connector (0.0.1)   - Use to connect Magento 2.

flask-manager (0.0.1a0)   - A CRUD manager for Flask

flask-metrics (0)   -

Flask-MongoMyAdmin (0.1)   - Simple MongoDB Administrative

Interface for Flask

flask-multistatic (1.0)   - Simple flask plugin to allow

overriding static files

Flask-OmMongo (1.0)   - Add Flask support for MongoDB

using OmMongo.

Flask-Pika-NG (0.3.3)   - Pika amqp flask extension

flask-ratelimit (0.0.1)   -

Flask-ResponseFactory (0.1)   - Create Flask response objects

in a declarative way

Flask-RESTive-MongoDB (0.0.1)   - Flask-RESTive extension to

Flask-RESTive-MongoDB (0.0.1)   - Flask-RESTive extension to
                                       work with MongoDB.

Flask-Search (0.01)   -

Flask-Sendmail (0.1)   - Flask extension for sendmail

flask-sleep (0)   -

Flask-SQLAlchemy-Meiqia (2016.8.1)   - Adds SQLAlchemy support to
                                       your Flask application

Flask-Static (0.1)   - Generates a static website
                                       from a Flask application

Flask-Stride (0.1.0)   - Flask adapter client for
                                       pystride

Flask-Stripe (0.1.0)   - Flask-Stripe

Flask-TaskTiger (0.0.1)   - Flask TaskTiger

flask-urls (0.9.2)   - A collection of URL-related
                                       functions for Flask
                                       applications.

Flask-User-Social (0.0.1)   - Role based user
                                       authentication for Flask.
                                       Extends Flask-User.

Flask-Watson (0.1.0)   - Flask-Watson

Flask-WebSocket (1.0)   - simple websocket for Flask

Flask-XML-RPC-Re (0.1.3)   - Adds support for creating
                                       XML-RPC APIs to Flask

flask-xuacompatible (0.1.0)   - Sets X-UA-Compatible HTTP
                                       header in your Flask
                                       application.

Flask-YunPian (0.0.1)   - Flask extension for YunPian

                                       API

quokka-flask-login (0.3.0)   - User session management for
                                       Flask

	Flask
flask-funktional-gae (0.0.1)	- flask-funktional-gae ~~~~~~~~~~~~~~~~~~~ flask extension to make functional testing of flask applications with the app engine sdk easier. used on top of the `flask-funktional <http://github.com/gregorynicholas/flask-funktional>`_ extension, it provides setup of app engine sdk stubs with a focus on being transparent and minimally invasive. links `````` * `docs <http://gregorynicholas.github.io/flask-funktional-gae>`_ * `source <http://github.com/gregorynicholas/flask-funktional-gae>`_ * `package <http://packages.python.org/flask-funktional-gae>`_ * `travis-ci <http://travis-ci.org/gregorynicholas/flask-funktional-gae>`_
Flask-Gladiator (0.1)	- Gladiator is a Data Validation Framework for Python3 (Flask Plugin)
Flask-GoogleFed (0.1)	- Google Federated Logins for Flask

Flask.

Flask-gzip (0.1)   - Compress responses in your
Flask app with gzip.

Flask-Habitat (0.1)   - Selectively load Flask
configuration values from
environment variables at
runtime.

flask-handlers (0.0.1)   - Handlers for Flask
applications

flask-inliner (1.0.0)   - Flask-Inliner converts CSS
<style> blocks to inline
style attributes

Flask-Intercom (0.1.0)   - Flask-Intercom

Flask-JsonSchemer (0.0.1)   - Flask extension for
validating JSON requets

Flask-JSON-Validation (0)   -

Flask-Kadabra (0.1.0)   - Flask extension for the
Kadabra metrics framework

flask-keystone (0.2)   - This project wraps the
existing keystone middleware
to provide courtesy user
functions within an API.

Flask-Landing (0.1.0)   - Landing page for collecting
emails.

Flask-Latch (0.1.0)   - Latch extension for Flask

Flask-LiveScript (0.1)   - implements the webassets
filter for livescript

Flask-MenuBuilder (0.9.2)   - An easy way to create menus
to use with flask.

Flask-MongoObject (0.1)   - Access MongoDB from your

Flask-MongoObject (0.1)   - Access MongoDB from your

Flask application

Flask-MultipleBlueprint (0.1)   - Decorate function using

multiple blueprints at once.

Flask-OldSessions (0.10)   - Provides a session class that

works like the one in Flask

before 0.10.

Flask-Paranoid (0.1.0)   - Simple user session

protection

Flask-Prometheus (0.0.1)   - Prometheus client

instrumentation for flask.

See

http://github.com/sbarratt

/flask-prometheus

Flask-PyMssql (0.1.0)   - PyMssql support for Flask

applications

Flask-Raptor (0.1)   - Raptor support for Flask

Flask-Registry (0.2.0)   - Flask-Registry is an

extension for Flask that

allow frameworks to

dynamically assemble your

Flask application from

reusable packages consisting

of blueprints, extensions,

and configurations.

flask-reveal (0.3)   - Make reveal.js presentations

with Flask

flask-revise (0)   -

Flask-RIP (0.1)   -

Flask-Roughage (0.1)   - Very short description

Flask-RouteLogger (0.1)   - Logging the meta route level

request- response information

in the structured manner for

your flask web application

flask-routes (0.1.0)   - Command line extension to

list all routes in a Flask

project

flask-secretbox-session (0.1.0)   - Flask client side session

serializer, using Sodium

SecretBox authenticated

encryption

flask-send-mail-util (0.1.0)   - Send an email via the Flask-

Mail extension, using text

and HTML templates.

Flask-SimpleSQLA (1.0)   - Extension providing basic

support of SQLAlchemy in

Flask applications

Flask-Slacker (0.0.1)   - Adds support to your Flask

application using Slacker.

Flask-SocketAPI (0.2)   - Lightweight library to create

streaming APIs over Flask-

SocketIO

Flask-SockJS (0.1.0)   - Simple integration of Flask

and SockJS

Flask-Token (1.0)   - 快速生成API认证令牌

Flask-Twilio (0.0.1)   - Make Twilio voice/SMS calls

with Flask

Flask-UltraJSON (0.0.1)   - Integrates UltraJSON with

your Flask application.

Flask-UrlDiscovery (1.1.1)   - A Flask extension for
discovering urls in a
service. Automatically
exposes urls for a service

flask-uuid-utils (0.1.0)   - Utilities for working with
UUID fields in Flask.

Flask-WebGlEarth (0.1.3)   - Simple extension for Flask to
use WebGl Earth

Flask-Whiteprint (0.0.1)   - An enhancement of flask
blueprint.

flask-wikimediaui (0.0.1)   - This library provides python
Flask utilities and static
assets for rendering
Wikimedia UI elements

Flask-WX-OAuth (0.1.1)   - Flask Extension for wechat
oauth2.0.

flask-funktional (0.0.1)   - flask-funktional
~~~~~~~~~~~~~~~~ flask
extension which hopes to make
functional testing easier.

Flask-GzipBomb (0.1.0)   - Gzip Bomb responses for Flask

Flask-Headers (1.0)   - A Flask extension making

adding headers one decorator

away

Flask-ICU (0.9.1)   - Adds i18n/l10n support to

Flask applications

flask-id (0.0.1)   -

Flask-InfluxDB (0.1)   - Flask bindings for the

InfluxDB time series database

Flask-JIRA (0.0.2)   - Flask extension that provides

simple integration with JIRA

REST API

Flask-JSUtils (0.1)   - Flask utilities in your

javascript

Flask-MakoTemplates (0.2)   - All future development will

be done under the name Flask-

Mako at

<http://pypi.python.org/pypi

/Flask-Mako>

flask-multiconfig (0.1)   - A simple extension to add

advanced configuration source

support.

flask-myapi (0.1)   - Flask-MyAPI - RESTful support

library for Flask

Flask-Negotiate (0.1.0)   - Content negotiation utility

for Flask apps

Flask-NextCaller (0.1.0)   - Flask-NextCaller

Flask-NoExtRef (0.1)   - Support for hiding external
URL

Flask-Notifications (v0.1.0.dev20150000)   -

Flask-oDesk (0.4.1.1)   - Adds oDesk API support to
Flask

Flask-OrientDB (0.1)   - A Flask extension for using
OrientDB with Flask

Flask-OtpAuth (0.0.1)   - One Time Password
Authentication for Flask

Flask-Passlib (0.1)   - Flask extension for passlib

flask-paypal (0.1.0)   - Flask integration with
PayPal, mainly focused on
subscriptions.

Flask-Quik (0.1.1)   - Quik for Flask

Flask-RequestID (0)   -

Flask-Roots (0.0.1)   - Lightweight personal git
server.

flask-rst (0.1)   - Create a static website from
simple reStructuredText files

Flask-SaeStorage (0.9.0)   - SAE Storage for Flask

flask-samurai (0.1)   - Easily create Heroku addons
in Flask.

flask-schematics (0)   -

flask-segmentio (0.1.0)   - Adds SegmentIO support to
your Flask application

flask-shell-ptpython (0.0.1)   - Replace the default `flask
shell` command with a similar
command running Ptpython.

flask-simple (0.0.1)   - SimpleDB integration for

Flask.

Flask-Sixpack (0.0.1)   - Flask wrapper for Sixpack

Flask-SPF (0.0.0)   - Flask-SPF

Flask-SSLify-flexme (0.1.6)   - Force SSL on your Flask app.

Flask-WeChat (0.1.0)   - a simple flask extension for

setup wechat service.

flask-wechat-kit (0.0.1)   - flask blueprint for wechat

flask-yeoman (0.1.0)   - UNKNOWN

flask-zabbix (0.1.1)   - Zabbix API wrapper

Flask-ZODB (0.1)   - Use the ZODB with Flask

google-oauth-flask (0.0.1)   - UNKNOWN

nickw-flask-utils (1.2.1)   - A set of utilities to make

working with flask web

applications easier.

hyperdns-flask (0.9.4)   - HyperDNS Flask Utilities

launchkey-flask (0.1.0)   - LaunchKey authentication

extension for Flask

Flask-FluidDB (0.1)   - Fluiddb access for flask

Flask-FontAwesome-Headers (0.1.0)   - Sets CORS HTTP response

headers for Font-Awesome

files served by Flask's

send_file().

flask-gae (0.1.0-20140530)   - Commons for Flask running on

Google App Engine

Flask-HipPocket (0.2.0b1)   - A wrapper around Flask to

ease the development of

larger applications

Flask-HttpCaching (0.01)   - flask http caching

Flask-HTTPS (0.1.0)   - Make HTTPS required on any

Flask app

Flask-Imagine-GoogleAdapter (0.4)   - Google Cloud Storage adapter

for Flask-Imagine extension.

Flask-Imagine-S3Adapter (0.4)   - Amazon AWS S3 adapter for

Flask-Imagine extension.

flask-jade2underscore (0.1)   - A small Flask extension adds

suppot to Jade2Underscore

templates compiler (used in

Backbone) to Flask.

Flask-Maoko (0.1.1)   - Mako templating support for

Flask applications.

Flask-Material-Lite (0.0.1)   - An easy way to get started

with Google's Material Lite

in your next Flask project,

without any boilerplate code.

flask-memcache-session (2.0)   - Use memcache for store

session data

Flask-Mime (0.1.0)   - Provides MIME type based

request dispatching

mechanism.

Flask-Modus (0.0.1)   - Flask Method Overriding

Middleware.

Flask-mongobit (0.1.2)   - MongoBit support in Flask

flask-morepath (0.1)   - UNKNOWN

flask-nap (0.0.1)   - Flask REST Framework

Flask-OAuth2Server (0.1)   - Flask-OAuth2Server allows you

to quickly add an OAuth2

provider to your Flask

application.

flaskpress-flask-htmlbuilder (0.13)   - Fork of Flexible Python-only

HTML generation for Flask

Flask-PubSub (0.1.0)   - Flask-PubSub

Flask-QSSession (0.3.0)   - Add server-side session

support for Flask application

Flask-Resource (0.0.1)   - Build resource-oriented Web

apps with Flask.

Flask-RethinkDB (0.2)   - Adds RethinkDB support to

Flask

Flask-Sandbox (0.1.0)   - ACL Route controls for Flask

flask-schema (0.1a)   - Schema Validation for your

JSON APIs

Flask-SQLAlchemy-tw (3.0-dev-20160331)   - Adds SQLAlchemy support to

your Flask application

Flask-SRI (0.1.0)   - Flask-SRI

flask-stacksentinel (1.2.1)   - Stack Sentinel error tracking

integration with Flask

flask-stylus2css (0.1)   - A small Flask extension that

adds Stylus support to Flask.

flask-swaggerui (0.0.1)   - This library provides python

Flask utilities and static

assets for rendering Swagger

UI

flask-thumbor (0.1.0)   - Flask utilities to use

thumbor images.

Flask-Tiger (0.1.2)   - api client for flask

extension

Flask-Transit (0.1.0-pre)   - A flask extension for working

with transit data.

Flask-Tweepy (0.1)   - Tweet easily from Flask

applications

Flask-Webhook (0.1.0)   - Create Flask application

webhooks with attached

handlers

flask-webpackext (0.1.0)   - Webpack integration for

Flask.

Flask-WkHTMLtoPDF (0.1.0)   - Convert JavaScript dependent

Flask templates into PDFs

with wkhtmltopdf.

flask-ws (0.0.1.0)   - Websocket for flask.

flask-wysiwyg (0.1)   - flask-wysiwyg provides custom

form fields to render wysiwyg

editor instead of regular

textareas. It takes care of

cleaning html for you too.

With its super secure

defaults you do not want to

modified it's whitelisting

rules.

Flask-XStatic (0.0.1)   - Flask support for XStatic

assets

recast-flask-frontend (0.1.0)   - new frontend for the RECAST

project

tdewitt_AC-Flask-HipChat (0.2.9.dev0)   - Atlassian Connect library

based on Flask for HipChat

flask-flywheel (0.1.0)   - Adds Flywheel support to your

Flask application

Flask-Generator (0.1)   - Generator tool to quickly

create flask application

skeleton.

Flask-Imagine-RackspaceAdapter (0.4)   - Rackspace Files adapter for

Flask-Imagine extension.

Flask-Keen (0.1.0)   - Flask-Keen

flask-lambda2 (1.0.0)   - Python package to add

compatibility between Flask

and AWS Lambda for creating

RESTful applications.

Flask-Leancloud-Sms (0.1)   - Leancloud SMS Service for

Flask

flask-letsencrypt (0.1)   - UNKNOWN

flask-log (0.1.0)   - Configure logging in flask

applications

Flask-MongoRest-Swagger (0.1)   - Swagger API generation for

Flask-MongoRest

Flask-MoSession (0.2)   - Mongodb based server side

session management system for

Flask

flask-negotiate2 (0.2.0)   - Content negotiation utility

for Flask apps

Flask-NIH (0.1.0.dev1)   - A toolkit to write static

site generators using Flask

as a basis.

flask-notifyAll (1.0.2)   - Simple tool which will

provide sms and email

notifications

Flask-NSQ (0.1.0)   - Adds NSQ support for your

Flask application

Flask-OAuth2 (0.01)   -

Flask-Obscure (1.0)   - Obscure numerical IDs in URLs

flask-oslolog (0.1)   - This project wraps the

existing oslo.log library to

providerequest logging and

logger access within flask..

Flask-PAM (0.1rc1)   - Flask authentication using

PAM

Flask-PJAX (0.0.1)   - PJAX Templating for Flask

Applications

Flask-Pony (1.0.1)   - PonyORM for your Flask

application

Flask-PyOTP (0.0.1)   - PyOTP warpper for flask.

Flask-Register (0.1.0)   - A extension of Flask to

control Register view.

Flask-RegisterBlueprints (0.1.0)   - Dynamically register Flask

blueprints on application

object

Flask-ResponseExt (0.2.0)   - An extension of the Flask

Response class.

Flask-RESTbolt (0.1.0)   - Powerful and fast framework

for creating REST APIs with

Flask

flask-restful-swagger-flexme (0.20)   - Extract swagger specs from

your flast-restful project

flask-r-login (0.0.1)   -

Flask-Scaffold (0.5.1)   - Scaffold Database

Applications in MySQL or

PostgreSQL with Flask

flask-simple-login (0.0.1)   - Easily turn your python data

into a flot graph in a static

html file.

Flask-SocialShare (0.0.1)   - Flask social sharing helpers

flask-spring (0.1.0)   - Adds the Spring framework

support to your Flask

application

Flask-SQLService (0.1.0)   - Flask extension for

sqlservice

Flask-SSDB (0.0.1)   - Flask simple ssdb client

flask-structlog (0)   -

flask-toolbox (0.0.2)   - A flask toolbox.

Flask-Upload (0.0.1)   - A simple and brief utility

tools framework

Flask-UserEnvConfig (0.1.12)   - Configure a flask app with

environment variables or a

file.

Flask-Validictory (0.1.0)   - Simple integration between

Flask and Validictory.

flask-zappa (0.0.1)   - Serverless Flask With AWS

Lambda + API Gateway

restaurant-service-flask (0.1.0)   - Restaurant Service - Flask

Version

toga-flask (0.0.0)   - A Flask backend for the Toga

widget toolkit.

Flask-Fleem (0.0.5)   - Theming for Flask

applications

Flask-Gist (0.1.1)   - A simple flask extension to

render Github Gists on
template

Flask-Ink (3.1.10) - Easily integrate Sapo Ink's

framework in your Flask

project.

flask-ipblock (0.3) - Block certain IP addresses

from accessing your Flask app

flask-itemshop (0.2) - Simple flask blueprint

(ItemBP) that you can mount

in your app to get a basic

purchase flow for a single

item. Credit card processing

is done with stripe.js and

the stripe python API.

Flask-JsonSchemaValidator (0.2) - Basic JSON Schema Validator

for the Flask web framework.

flask-jsontools-slippers (0.1.6) - JSON API tools for Flask

Flask-Kerberos (1.0.4) - Kerberos authentication

support for Flask

flask-konch (1.1.0) - An improved shell command for

the Flask CLI

Flask-Manifest (0.2.0) - Asset manifest integration

with Flask.

Flask-MarrowMailer (0.2.0) - Marrow Mailer integration for

Flask.

flask-MenuManager (1.0a2) - An easy way to build and

manage menus in Flask

Flask-Postmark (0.2.0) - Postmark Flask extension

Flask-Project (0.1.1) - Flask project template

generator.

Flask-RateLimiter (0.2.0)   - Flask-RateLimiter is an

extension for Flask that adds

support for rate limiting.

Flask-Redistore (1.0.1)   - Adds Redis support to your

Flask applications

Flask-ReqArg (0.1.5)   - The decorator that maps

request arguments into

function arguments.

flask-request-id (0.1)   - Extract yourself some Request

IDs.

Flask-SlimREST (0.1.1)   - Flask extension for building

RESTful APIs

Flask-SSE (0.2.1)   - Server-Sent Events for Flask

Flask-StatsD (0.1.1)   - Access to statsd in your app.

Flask-Webhelpers (0.1)   - Simple integration of Flask

and Webhelpers

quokka-flask-security (1.7.4dev2)   - Fork of Simple security for

Flask apps

thunderdome-flask (1.0.2)   - Thunderdome Flask integration

Flask-FlatPagesCut (0.5.1)   - Flask-FlatPagesCut is fork

Flask-FlatPages (Provides

flat static pages to a Flask

application)

Flask-fluentd (0.2)   - Log fluentd events from Flask

Flask-Fundatio (0.1)   - Flask extension to integrate

the Foundation front-end

framework

flask-gae_messages (1.0.1)   - Flask extension for working

with messages using the mail
& xmpp apis on App Engine.

flask-gemoji (0.2.0)   - Add gemojis to your Flask
apps

Flask-Heroku-Helpers (0.0.2)   - Flask helpers for Heroku Apps

Flask-Heroku-Runner (2)   - Minimalist Heroku bootstrap
for Flask

flask-http2-push (0.0.3)   - A Flask extension to add
http2 server push to your
application.

Flask-JsonSchema (0.1.1)   - Flask extension for
validating JSON requets

Flask-OpenAPI (0.1.0a1)   - Generate a swagger.json
handler from a Flask app

Flask-Paginated-Response (1.0.1)   - Response maker for Flask with
RFC Standards such as Link
Headers

flask-request-id-middleware (1.1)   - Adds Request ID inside your
http requests to better
identify what's happening on
your app

Flask-Restdoc (0.0.2)   - Flask-Restdoc is a simple
tool that generates RESTful
API documentation
automatically from python
files.

flask-restless-swagger (0.2.1)   - Magically create swagger
documentation as you
magically create your RESTful

API

Flask-SAPB1 (0.0.2)   - Use to connect SAP B1 DI API.

Flask-SL (0.0.4)   - Basic recognition of Second

Life® requests.

Flask-Stache (0.1.1)   - Simple mustache templating

for Flask applications

Flask-Theme (0.2.0)   - Provides infrastructure for

theming Flask applications

flask-thumbs (1.2)   - An extension managing

thumbnail based on flask-

thumbnails

flask-tml (0.3.1)   - Flask SDK for

tranlationexchange.com API

Flask-Wdb (0.0.2)   - Integrate Wdb instead of

Werkzeug debugger for Flask

applications

graphql-flask (1.1.0)   - Adds GraphQL support to your

Flask application

labirinto-flask (0.1.1)   - Joguinho de labirinto usando

Flask + GTM

flask-graphql-subscriptions-transport (0.1.4) - Adds subscription transport

layer for Flask applications

using GraphQL

Flask-GSA (0.1.1)   - A simple wrapper for the

Google OAuth2 client library

Flask-Gunicorn (0.1.1)   -

Flask-Hashing (1.1)   - Easy hashing of data in Flask

Flask-Inject (1.1.0)   - A micro dependency injection

framework for Flask micro web

framework :)

Flask-Jigger (0.0.2)   - Web APIs for Flask,

unintrusive.

Flask-JWTAuthorization (0.0.5)   - Authorization framework based

on JWT for Flask applications

Flask-Migrate-tw (1.8.1)   - A custom version of Flask-

Migrate, which depends on

Flask-SQLAlchemy-

tw(v3.0)using Alembic

flask-mixpanel (0.1.1)   - Wrappers for using Mixpanel

in Flask

Flask-MongoSet (0.1.8)   - Access MongoDB from your

Flask application

Flask-Multi-Session (0.1.7)   - Redis multi-sessions for

Flask apps

Flask-NYC (0.1.1)   - New York Flask Meetup

Flask-Pagination (0.0.1)   - Pagination Helpers for Flask

Apps

flask-passwordless (0.1.1)   - Flask extension for

passwordless login

Flask-Phrase (1.0.0)   - Connect your Flask apps to

PhraseApp, the powerful in-

context-translation solution.

Flask-SACore (0.0.3)   - SQLAlchemy Core extension for

Flask

Flask-SES (0.1.1)   - Flask extension for

interfacing with AWS' SES

service

flask-sqlalchemy-rls (0.0.2)   - Flask-SQLAlchemy with row-

level security

Flask-Storage (0.1.1)   - Flask upload and storage
extensions.

Flask-Storage-Helpers (0.1.5)   - Various file storage backends
for Flask apps.

flask-template-loader (0.0.3)   - UNKNOWN

Flask-Triangle-joeflack4 (0.5.6)   - Integration of AngularJS and
Flask, originally created by
Morgan Delahaye-Prat
(mdp@m-del.fr).

flask-yamli18n (0.1.4)   - Use yaml files as translation
files in flask

Flask-FormEncode (0.10.1)   - A form validation extension
for Flask using the
FormEncode package.

flask-go (0.1.1)   - Let you create flask project
like use django-admin

flask-heroku-mongoengine (0.1.5)   - Heroku environment variable
configurations for Flask

Flask-Heroku-RQify (0.2)   - Automatic RQ configuration
for your Heroku Flask
applications.

Flask-libsass (1.1.0)   - Flask extension for building
css from sass or scss

Flask-Mobility (0.1.1)   - A Flask extension to simplify
building mobile-friendly

sites.

Flask-MySQLdb (0.2.0)   - MySQLdb extension for Flask

Flask-OAuthRes (0.2.0)   - OAuth Resource for Flask

Flask-PaperTrail (0.0.2)   - Adds PaperTrail logging to

your Flask application

Flask-Pigeon (0.11.0)   - Flask messages extension.

Flask-PluginEngine (0.3)   -

Flask-PyFCM (0.1.1)   - Flask extension for PyFCM

Flask-PyQuery (0.1)   - PyQuery templating support

for Flask applications.

Flask-QiniuStorage (0.9.4)   - Qiniu Storage for Flask

flask-rollbar (1.0.1)   - A sane configuration for

Rollbar for Flask selfishly

based on my own needs

Flask-Router (0.1.1)   - Tuned flask's URL routing

library

Flask-RQ (0.2)   - RQ (Redis Queue) integration

for Flask applications

Flask-Sass (0.9)   - A small Flask extension that

makes it easy to use Sass

with your Flask application.

Flask-Shelve (0.1.1)   - Shelve support for Flask

Flask-Sockets-Tornado (0.1.1)   - Elegant WebSockets for your

Flask apps.Tornado style app

included

Flask-Sphinx-Themes (1.0.1)   - Sphinx themes for Flask and

related projects.

flask-tmpl (0.2.0)   - PasteScript templates for the

Flask+Celery+SQLAlchemy

Flask-Travis (0.0.2)   - Easily fetch Travis CI

environment variables when

testing.

Flask-UUID (0.2)   - UUID url converter for Flask

routes

Flask-WatQY (0.0.3)   -

Flask-WTF-Polyglot (0.2)   - Flask-WTF companion library

providing `PolyglotForm` for

polyglot HTML output

Flask-Zurb-Foundation (0.2.1)   - A Foundation Wrapper for

Flask

Thread-Flask-Prometheus (0.0.3)   - Prometheus client

instrumentation for flask.

Flask-FlatPages-Pandoc (0.2)   - Pandoc rendering for Flask-

FlatPages

Flask-Gfwlist2Pac (0.0.2)   - Flask application to generate

PAC file based on gfwlist

Flask-httpretty (1.3.0)   - flask-httpretty help you to

mock http requests via flask.

flask-lesscss (0.9.1)   - A small Flask extension that

adds LessCSS support to

Flask.

Flask-Mistune (0.1.1)   - A interface between the Flask

web framework and the Mistune

Markdown parser.

Flask-OlinAuth (1.0.1)   - A simple Flask extension

implementing Olin's

authentication

flask-optimize (0.2.6)   - Flask optimization: cache,

minify html and gzip response

flask-otp (1.2)   - One-Time Password extension

to Flask

Flask-Profile (0.2)   - Flask Application Profiler

flask-project-templates (0.2)   - Paster templates for creating

Flask projects

Flask-Pyco (0.2)   - Simple flat file CMS inspired

by Pico and Jekyll

Flask-Reggie (0.0.2)   - Flask Regex Routes.

Flask-Responses (0.2)   - Simple response utility for

Flask

Flask-REST (1.1)   - A simple REST toolkit for

Flask

flask-robohash (1.0.1)   - robohash.org avatars that you

can use with the

microframework Flask.

Flask-SAResource (0.1.1)   - Flask extension for building

routes from SQLAlchemy models

Flask-SOEditor (0.1.2a0)   - A Stack Overflow editor

extension for Flask.

flask-sqlacodegen (1.1.6.1)   - Automatic model code

generator for SQLAlchemy with

Flask support

Flask-SQLAlchemy-Session (1.1)   - SQL Alchemy session scoped on

Flask requests.

flask-swagger-plus (0.0.3)   - extract swagger spec from

source code and docstring for

a flask app

flask-telegram (0.0.2)   - flask-telegram flask

extension for delivering

messages. send via the app

engine mail or xmpp apis,

and/or other third party providers such as sendgrid. links: * docs: http://gregorynicholas.github.io/flask-telegram * source: http://github.com/gregorynicholas/flask-telegram * package: http://packages.python.org/flask-telegram * travis-ci: http://travis-ci.org/gregorynicholas/flask-telegram

flask-transfer (0.1.0)   - Validate and process file uploads in Flask easily

flask-utils (0.1.1)   - Various Flask utilities.

flask-whooshalchemy3 (0.1.1)   - Whoosh indexing capabilities for Flask-SQLAlchemy, Python 3 compatible.

Flask-WXApp (0.1.2)   - Flask Extension for WeChat App.

Flask-Zen (0.2)   - Flask-Script commands to integrate with PyZen.

flask-gae_blobstore (1.0.2)   - Flask extension module for working with the blobstore & files apis on App Engine.

Flask-HAL (1.0.4)   - Provides easy integration of the HAL specification for your REST Flask Applications.

Flask-Hopak (0.1.0)   - Admin interface for Flask

that uses Hopak models

flask-lazyapi (0.4.8)   - A Simple, Restful MongoDB

Server built on Flask and

Flask-Classy

Flask-MicroServices (0.34.5)   - Self contained modules and

Django style URL routing for

Flask.

Flask-PagedList (0.2.1)   - Add pypagedlist support for

Flask

flask-ponywhoosh (1.0.2)   - A search engine for flask

framework using pony orm.

Flask-Pushjack (1.0.0)   - Flask extension for push

notifications on APNS (iOS)

and GCM (Android).

Flask-RestClient (0.1.2)   - restful api client for flask

extension

Flask-RESTive-Identifiers (0.0.3)   - Flask-RESTive extension to

work with identifiers.

flask-rethinkview (0.1.2)   - RESTful Flask View with

RethinkDB

Flask-ShellPlus (0.0.3)   - UNKNOWN

Flask-Simple-Serializer (1.1.3)   - Simple Serializers for API

validations

Flask-Sockets (0.2.1)   - Elegant WebSockets for your

Flask apps.

Flask-Soy (0.3)   - Provides support for Closure

Templates (Soy) in Flask.

Flask-Twisted (0.1.2)   - Simple integration of Flask

and Twisted

Flask-WeRoBot (0.1.2)   - Writing WeChat Robot by

WeRoBot in Flask.

Flask-Zero (0.9.6)   - Qiniu Storage for Flask

sa-flask-restful-resource (0.0.3)   - base class for sqlalchemy and

flask-restless

Flask-HashFS (0.3.0)   - Flask extension for HashFS, a

content-addressable file

management system.

Flask-HMAC (0.1.3)   - Flask HMAC generator,

checker, and route decorator

Flask-JWT-Login (0.0.3)   - Flask extension that helps

authentication using JWT

Flask-JWT-Simple (0.0.3)   - Simple JWT integration with

Flask

Flask-Kaccel (1.0.1)   - Add Flask support for Nginx

X-Accel

Flask-MongoNorm (0.2.0)   - MongoNorm support for Flask

applications

Flask-naver (1.2)   - Oauth2 wraper for Naver login

Flask-Navigation (0.2.0)   - The navigation of Flask

application.

Flask-Pilot (0.5.0)   - Flask-Pilot is a Flask

extension that adds structure

and map your views and

templates together for rapid

application development

Flask-Simon (0.3.0)   - Simple MongoDB Models for

Flask

flask-sparkle (0.2.1)   - Flask app that publishes

Sparkle update feeds

flask-sqlite_admin (0.3)   - SQLite DB Management

Blueprint for Flask

Applications

Flask-Storm (0.1.2)   - Storm integration for Flask.

Flask-Thunderargs (0.3.1)   - Implements thunderargs to

flask framework.

Flask-Views (0.2.1)   - Class based views for Flask

Flask-XML-RPC (0.1.2)   - Adds support for creating

XML-RPC APIs to Flask

Humanize-Flask (0.2.0)   - Common humanization utilities

for Flask applications.

Flask-Healthcheck (0.1.2)   - Healthchecks for flask

applications made easy

flask-hmacauth (0.3.9)   - A module to simplify working

with HMAC auth in Flask apps

Flask-ini (0.2.1)   - Allow Flask to be configured

with configparser ini files

Flask-Inputs (0.2.0)   - Flask request data validation

flask-ldap-login (0.3.0)   - UNKNOWN

Flask-Mitten (0.2.1)   - Adds security functions to

Flask applications for

preventing some of the basic

threats.

flask-mongo-model (0.0.3a4)   - A module provides basic ORM

feature for MongoDB to Flask

applications.

Flask-Obscurity (0.4)   - Security-by-obscurity. Move

along, nothing to see here.

flask-osiaui (0.0.2)   - This library provides python

flask-oojsui (0.0.3)   - This library provides python

Flask utilities and static

assets for rendering

Wikimedia UI elements

Flask-Pystmark (0.11.1)   - A Flask extension for

Postmark API library Pystmark

Flask-QueryInspect (0.1.2)   - Flask extension to provide

metrics on SQL queries per

request.

Flask-RESTive (0.0.3)   - Flask RESTive is a REST API

Flask extension based on

Flask-RESTful & Marshmallow.

Flask-reStructuredText (1.2)   - Small extension to make using

rst easy

Flask-Rev (0.1.2)   - Easily integrate flask with

revisioned static files

Flask-Routing (0.0.21)   - Alternative web.py style

routing for Flask

Flask-Sendwithus (1.0.2)   - Forwards-compatible Flask

extension to interact with

the sendwithus API

Flask-SimpleMDE (0.3.0)   - Flask-SimpleMDE - a Flask

extension for SimpleMDE

Flask-Sitemap (0.2.0)   - Flask extension that helps

with sitemap generation.

Flask-Split-JS (0.2.1)   - A JavaScript library for

Flask-Split.

Flask-TokenAuth (0.1.0)   - Token-based authentication

for Flask routes

flask-wdb-hook (0.1.2)   - Hook to replace flask

flask-wdb-hook (0.1.2)   - Hook to replace flask

werkzeug debugger with wdb.

Flask-YAMLConfig (0.0.3)   - YAML configurator for Flask

app.

Flask-GCM (0.2.0)   - Flask-GCM is a simple wrapper

for the python-gcm library to

be used with Flask

applications.

Flask-GSSAPI (1.1.1)   - HTTP Negotiate (GSSAPI)

authentication support for

Flask applications.

Flask-HTAuth (0.1.2)   - Easy to integrate basic HTTP

authentication for Flask apps

Flask-JSONPages (0.2)   - Provides static pages to a

Flask application based on

JSON

Flask-Meter (0.1.2)   - Flask-Meter adds a monitoring

endpoint for consuming

application host metrics.

flask-restful-routing (1.0.3)   - An easier way to register

flask-restful routes

Flask-RSTPages (0.3)   - Adds support for

reStructuredText to a Flask

application

Flask-Runner (2.1.1)   - A set of standard command

line arguments for Flask

applications built on top of

Flask-Script

Flask-ServerInfo (0.1.2)   - Flask server info view for

inspecting server app and

inspecting server app and

user requests

Flask-Sillywalk (2.1)   - So you want to implement an

auto-documenting API?

Flask-SimpleACL (1.2)   - Simple ACL extension

Flask-Spyne (0.3.1)   - A Flask extension, provides

support for Spyne.

Flask-ThriftClient (0.2.0)   - Adds thrift client support to

your Flask application

Flask-Upwork (1.0-pre2)   - Upwork API support to Flask

flask-ypaginate (0.1.3)   - Pagination for Flask

Webstack-Flask-JWT (0.4)   - JWT token authentication for

Flask apps

Flask-GAE-Mini-Profiler (0.1.2)   - Flask integration of

gae_mini_profiler

flask-gae_tests (1.0.2)   - Flask Extension with base

test cases to simplify

testing Flask applications on

App Engine.

Flask-Geckoboard (0.2.1)   - Geckoboard custom widgets for

Flask projects

Flask-GoogleCharts (0.0.3)   - Google Charts API support for

Flask

Flask-Humanize (0.3.0)   - Common humanization utilities

for Flask applications.

Flask-Hypertable (0.3.0)   - A Flask extension for

Hypertable over Thrift.

Flask-Log-Request-ID (0.9.4)   - Flask extension that can

parse and handle multiple

types of request-id sent by

types of request-id sent by

request processors like

Amazon ELB, Heroku or any

multi-tier infrastructure as

the one used for

microservices.

Flask-MimeRender (0.1.3)   - RESTful resource variant

rendering using MIME Media-

Types, for the Flask Micro

Web Framework

flask-mongo-sessions (0.2.1)   - Server-side sessions for

Flask with MongoDB

Flask-ObjectRocket (0.2.1)   - User authentication with the

ObjectRocket API.

flask-orator (0.2.0)   - Adds Orator support to your

Flask application

Flask-RedisSession (0.1.2.0)   - add server-side session,

stored by Redis

flask-resty-shared-session (0.1.2)   - An adapted flask-session

module and corresponding

OpenResty package, so flask

and Nginx can share session

information.

Flask-Settings (0.0.3)   - Flask settings extension is

similar to Django settings.

Flask-SSO (0.4.0)   - Flask-SSO extension that

eases Shibboleth

authentication.

Flask-Stats (1.0.1)   - A flask plugin to keep stats

about your application

about your application

Flask-Swag (0.1.2)   - Build swagger spec with

Flask.

Flask-thridy (0.0.3)   - simple use thridy for login

you web

Flask-Zipkin (0.0.3)   - An zipkin extension for Flask

based on py_zipkin.

quokka-flask-mongoengine (0.7.4)   - Fork of Flask support for

MongoDB and with WTF model

forms

kore-plugins-flask (0.0.4)   -

Flask-Gulp (0.3.0)   - Task executioner similar to

gulp for Python

Flask-Hooker (1.0.3)   - Receive and manage webhooks

of several services at the

same time

Flask-Jsonpify (1.5.0)   - A Flask extension adding a

decorator for JSONP support

Flask-Mandrill (0.3)   - Adds Mandrill support to

Flask applications

Flask-OASSchema (0.9.4)   - Flask extension for

validating JSON requests

Flask-Psycopg2 (1.3)   - postgresql adapter for Flask

Flask-RBAC (0.3.0)   - RBAC support for Flask

flask-reverse-proxy (0.2.0.2)   - A Flask extension for

applications in a reverse

proxy not at the root

Flask-SQLAlchemySession (0.0.4)   - UNKNOWN

Flask-Themes (0.1.3)   - Provides infrastructure for

theming Flask applications

Flask-URS (0.1.3)   - JWT token authentication

using NASA URS Oauth2 for

Flask apps

Flask-Venom (1.0.2)   - Flask extension for the Venom

RPC framework

Flask-Widgets (0.4)   - This extension provides basic

template widget feature for

Flask

Flask-FlatPages-Knitr (0.3.1)   - Knitr preprocessing for

Flask-FlatPages

Flask-GeoIP (0.1.3)   - Flask-GeoIP -------------

Simple Flask extension for

pygeoip.

Flask-Hierarchy (0.1.1)   - Finally working permission

manager for Flask!

Flask-HTMLmin (1.2.1)   - Minimize render templates

html

Flask-JSONRPC (0.3.1)   - Adds JSONRPC support to

Flask.

flask-lambda (0.0.4)   - Python module to make Flask

compatible with AWS Lambda

for creating RESTful

applications

Flask-Mailer (0.4.0)   - A Flask extension for sending

emails with pluggable

backends.

Flask-MAuth (1.1)   - MAuth Client and Server

Library for MAuth

flask-media (0.4.6)   - Flask extestion helper

uploads files

Flask-MetaRoute (1.3.0)   - Extra routing capabilities

for Flask

Flask-NewProject (0.2.1)   - Create new Flask project.

Flask-Pages (0.1.4)   - Another? flask extension that

provides dynamic pages.

Flask-WaffleConf (0.3.1)   - Store variables in database

and update them at runtime

Flask-wechatpy (0.1.3)   - wechatpy for flask extension

Flask-Graylog (1.1.2)   - Configure Graylog logging

handlers and middleware for

your Flask app

Flask-OAuth (0.12)   - Adds OAuth support to Flask

Flask-QR (0.1.3)   - Flask extension for

generating qr codes

Flask-ServiceLayer (0.0.4)   - Base classes to create a

Service Layer in Flask.

flask-skel (0.4)   - Basic Flask paster skeleton

template

py-jsonapi-flask (1.0.3b0)   - The Flask extension for py-

jsonapi

Flask-Gears (0.2)   - Gears for Flask

Flask-Github (0.1.3)   - Adds support for authorizing

users with Github to Flask

Flask-Goat (0.2.1)   - Flask plugin for security and

user administration via

GitHub OAuth & organization

flask-jsonapi (0.3.0)   - JSONAPI 1.0 implementation

for Flask.

Flask-Logging (0.1.3)   - UNKNOWN

flask-macros (0.1.5)   - macros for flask projects

Flask-Mailgun (0.4)   - Adds Mailgun support to Flask

applications

Flask-Mako (0.4)   - Mako templating support for

Flask applications.

Flask-MoreSQL (0.4)   - Call PostgreSQL stored

procedures from Flask

Flask-SendGrid (0.5.2)   - Adds SendGrid support to

Flask applications

flask-sqlalchemy-plus (0.1.3)   -

Flask-TwitterBootstrap (0.0.4)   - UNKNOWN

kt-flask-sessions (0.1.3)   - Kyoto Tycoon backed sessions

for Flask

Flask-Init (0.0.3)   - Easy way to create Flask Web

application

Flask-JIRA-Helper (0.2.0)   - JIRA support for Flask

without breaking PyCharm

inspections.

Flask-JSGlue (0.3.1)   - Flask-JSGlue helps hook up

your Flask application nicely

with the front end.

Flask-JSONPlus (0.0.4)   - Flask extension for non-basic

types' serialization to JSON

via jsonplus lib.

flask-logsocketio (0.1.4)   - Flask LogSocketIo module

Flask-Nicely (0.2.0)   - Pretty Flask JSON responses

for API building.

flask-nidhogg (1.1.1)   - OpenSource Yggdrasil protocol

implementation

flask-oauthprovider (0.1.3) - A full featured and secure OAuth provider base

Flask-OpenERP (0.3.1) - OpenERP Connector for Flask

Flask-ReportableError (0.4.3) - handle errors that can be reported to the web client

Flask-RESTify (0.1.3) - Flask REST framework

Flask-Run (0.1.3) - Flask-based web application runner

Flask-SAML (0.4.3) - Flask SAML integration

Flask-Sessions (0.1.5) - Adds server-side session support to your Flask application

flask-shell (0.1.3) - Flask extension to improve shell command for the Flask CLI.

Flask-Shield (0.2.2) - Flask-Shield is an extension of Flask for permission management based on RBAC.

Flask-ShortUrl (0.2.0) - Short URL generaotr for Flask

Flask-Silk (0.2) - Adds silk icons to your Flask application or blueprint, or extension.

Flask-Stormpath-test (0.4.7) - Simple and secure user authentication for Flask via

Stormpath.

Flask-Velox (2014.04.25) - Velox is a set of classes & mixins to help rapidly build Flask applications.

Flask-Weixin-Login (0.2.1)   - Weixin Login from Flask

quokka-flask-htmlbuilder (0.13)   - Fork of Flexible Python-only

                              HTML generation for Flask

pylint-flask (0.5)   - pylint-flask is a Pylint

                              plugin to aid Pylint in

                              recognizing and understanding

                              errors caused when using

                              Flask

Flask-Jasmine (1.4)   - Execution of Jasmine

                              JavaScript tests within Flask

Flask-JqueryUiBootstrap (0.5.0.4)   - Flask jQuery UI Bootstrap

                              minimalistic fork of Flask-

                              Bootsrap extension

Flask-Pure (0.5)   - Flask-Pure - a Flask

                              extension for Pure.css

Flask-StatsdTagged (0.9)   - Flask extension for sending

                              statsd data with tags, for

                              use with telegraf statsd

                              plugin

Flask-Triangle (0.5.4)   - Integration of AngularJS and

                              Flask.

Flask-Twip (0.0.5)   - twitter API proxy extension

                              for Flask microframework

Flask-Versioned (0.9.4-20101221)   - Add version info to file

                              paths.

flask-hype (0.1.4)   - Flask extension for hype

Flask-IIIF (0.3.1)   - Flask-IIIF extension provides

                              easy IIIF API standard

                              integration.

Flask-IndieAuth (0.0.3.2)   - Allow requests to be

authenticated with

https://indieauth.com/

Flask-Nytro (1.2)   - Nytro is an extension to help

the developers providing a

set of useful tools giving

even more facility to

development apps with Flask.

Flask-Pika (0.3.8)   - Pika amqp flask extension

Flask-RestPoints (0.0.8)   - Adds some common health check

endpoints (ping, time,

status)

Flask-Sleuth (0.0.6)   - Spring Cloud Sleuth logging

implementation for Python

2/3.

Flask-WhooshAlchemy-Redux (0.7.1)   - Whoosh extension to

Flask/SQLAlchemy

Flask-With-Glasses (0.1.5)   - Enhanced flask app with

livereload and webassets.

More suitable for front end

development

flask-htpasswd (0.3.1)   - Basic authentication support

via htpasswd files in flask

applications

Flask-Idempotent (0.1.0)   - Idempotent requests for Flask

applications

Flask-JWT (0.3.2)   - JWT token authentication for

Flask apps

Flask-MongoKit (0.6)   - A Flask extension simplifies

to use MongoKit

flask-nav (0.6)   - Easily create navigation for
Flask applications.

Flask-Redis-Helper (1.0.0)   - Redis support for Flask
without breaking PyCharm
inspections.

Flask-Redtask (0.3.1)   - Redqueue integration for
flask

Flask-SocialAPI (1.0.5)   - Simple api for controlling
and login to provider

Flask-Statics-Helper (1.0.0)   - Provides Bootstrap3 and other
static resources in a modular
fashion.

Flask-WeasyPrint (0.5)   - Make PDF in your Flask app
with WeasyPrint.

flask-geokit (0.1.7)   - Geocoding toolkit

Flask-JWE (0.0.5)   - Add Flask Support for JWE
Requests

flask-pytest (0.0.5)   - Runs pytest in a background
process when DEBUG is True.

Flask-Rauth (0.3.2)   - Adds OAuth 1.0/a, 2.0, and
Ofly consumer support for
Flask.

Flask-RedisConfig (0.3.0)   - Redis-backed config for Flask
applications

Flask-Themes2 (0.1.4)   - Provides infrastructure for
theming Flask applications
(and supports Flask>=0.6!)

Flask-Tracy (0.1.3)   - Logs tracing information on a

per-request basis

Flask-Turbolinks (0.2.0)	- Turbolinks for Flask.
li-flask-validation (1.0.4)	- Flask Validation.
Flask-Fulfil (0.2.1)	- Fulfil.IO for Flask Apps
Flask-GoogleAuth (0.4.2)	- Super simple OpenID and

Google Federated Auth for

Flask apps.

Flask-kinesis (0.1.8)	- Flask plugin for aws kinesis

stream

Flask-MakeStatic (0.3.0)	- Make for your flask app

assets

Flask-PyMemcache (0.0.5)	- pymemcache integration for

Flask

Flask-Redis-Sentinel (2.0.1)	- Redis-Sentinel integration

for Flask

flask-rest4 (0.1.8)	- Elegant RESTful API for your

Flask apps.

Flask-Scss (0.5)	- Adds support for scss files

to Flask applications

Flask-SERVICE (0.1.4)	- A service api client for

Flask applications.

Flask-Smores (0.2.1)	- Validate inputs and document

routes using marshmallow

schemas

flask-swagger-ui (3.0.12a0)	- Swagger UI blueprint for

Flask

Flask-Uploads (0.2.1)	- Flexible and efficient upload

handling for Flask

Flask-WhooshAlchemyPlus (0.7.5)	- Whoosh extension to

Flask/SQLAlchemy

Flask-Menu (0.6.0)   - Flask-Menu is a Flask

extension that adds support

for generating menus.

Flask-Redislite (0.1.0rc0)   - Using Flask with Redislite

flask-secure-headers (0.6)   - Secure Header Wrapper for

Flask Applications

Flask-Slack (0.1.5)   - Slack extension for Flask.

Flask-WebSub (0.1.5)   - A WebSub hub, publisher and

subscriber using Flask

flask-keyauth (0.1.5)   - A module to simplify working

with KEY auth in Flask apps

Flask-MySQL (1.4.0)   - Flask simple mysql client

flask-pundit (1.1.0)   - Simple library to manage

resource authorization and

scoping

Flask-reCaptcha (0.4.2)   - The new Google ReCaptcha

implementation for Flask

without Flask-WTF

Flask-request-params (0.3.0)   - Flask-request-params provides

Rails-like interface to HTTP

Request Parameters for Flask.

Flask-RQ2 (17.0)   - A Flask extension for RQ.

Flask-Scrypt (0.1.3.6)   - Flask-Scrypt provides

convenient wrappers forscrypt

password hashing and random

salt generation.

Flask-Split (0.3.0)   - A/B testing for your Flask

application

Flask-StatHat (0.1.2)   - StatHat extension for Flask

Flask-Weixin (0.5.0)   - Weixin for Flask.

flask-idempotent2 (0.0.6)   - Redis based idempotent

support for sqlalchemy based

flaskapplications.

Flask-MAB (1.1.1)   - Multi-armed bandits for flask

flask-msearch (0.1.5)   - full text search with whoosh

for flask

Flask-OFAUTH (0.1.7)   - passport api client for Flask

applications.

Flask-Sleepy (0.3.0)   - REST is hard. Let's go

shopping

Flask-SSLify (0.1.5)   - Force SSL on your Flask app.

Flask-MongoRest (0.2.3)   - Flask restful API framework

for MongoDB/MongoEngine

Flask-PRISM (0.3.2)   - Simple APIs with Flask PRISM

Flask-Pushrod (0.3)   - Views for your API

Flask-Security-Fork (2.0.1)   - Simple security for Flask

apps.

Flask-Staticify (0.2.2)   - Looks for static files in the

additional locations as a

fallback

flask-talisman (0.4.0)   - HTTP security headers for

Flask.

flask-thumbnails-s3 (0.1.5)   - An extension to create image

thumbnails on Amazon S3 (or

on local storage) with the

Flask framework, based on

flask-thumbnails.

flask-xadmin (0.1.2)   - eXtended Flask-Admin

Flask-GraphQL (1.4.1)   - Adds GraphQL support to your

Flask application

Flask-JSON (0.3.2)   - Better JSON support for Flask

Flask-LogConfig (0.4.2)   - Flask extension for

configuring Python logging

module

Flask-Misaka (0.4.1)   - A pleasant interface between

the Flask web framework and

the Misaka Markdown parser.

Flask-PyBankID (0.3.1)   - Flask Extension for PyBankID

client

Flask-qiniu (1.1.4)   - Flask Qiniu extension

Flask-S3-gzip (0.1.8)   - Seamlessly serve the static

files of your Flask app from

Amazon S3 (forked from

original flask-s3)

Flask-Test (0.1.6)   - Various unit testing helpers

for Flask applications.

Flask-Track-Usage (1.1.0)   - Basic metrics tracking for

the Flask framework.

Flask-Upstatic (0.0.6)   - Opinionated library for

working with CDNs in Flask.

Flask-Via (2015.1.1)   - Provides a clean, simple URL

routing framework for growing

Flask Applications.

Flask-WAT (0.1.2)   -

flask-yoloapi (0.0.6)   - Simply the best Flask API

library

Flask-Sentinel (0.0.7)   - OAuth2 Provider for Flask
applications.

flask-zookeeper (0.0.8)   - Flask Zookeeper client

Flask-Genshi (0.5.1)   - An extension to Flask for
easy Genshi templating.

flask-kser (0.2.0)   - Flask KSer example

Flask-Snooze (0.1.6)   - Backend agnostic REST API
provider for Flask

flask-uiface (0.7)   - Random user avatars for the
rest of us!

Flask-Webpack (0.1.0)   - Flask extension for managing
assets with Webpack.

Flask-IdentityClient (0.5.2)   - PassaporteWeb connection for
Flask applications

Flask-Multipass (0.0.dev7)   -

Flask-Sessionstore (0.4.5)   - Adds session support to your
Flask application

Flask-WePay (0.0.7)   - WePay API support

flask-fs (0.4.1)   - Simple and easy file storages
for Flask

flask-shell-ipython (0.3.0)   - Replace default `flask shell`
command by similar command
running IPython.

Flask-FlatPages (0.6)   - Provides flat static pages to
a Flask application

Flask-ImageAlchemy (0.0.7)   - SQLAlchemy Standarized Image
Field for Flask

Flask-IPInfo (0.0.10)   - Get IP, ISP, Location, OS
from flask request

Flask-LazyViews (0.6)   - Registers URL routes for

Flask application or

blueprint in lazy way.

Flask-LDAP (0.1.6)   - Flask extension for LDAP auth

and profile user

Flask-LinkTester (0.3.0)   - Link tester for Flask

applications

Flask-Marcos (0.0.7dev)   - ERP apps Flask container

flask-statsd-tags (0.1.6)   - Flask extention for sending

statsd data

Flask-thumbnails (1.0.3)   - A simple extension to create

a thumbs for the Flask

Flask-Markdown (0.3)   - Small extension to make using

markdown easy

Flask-Session (0.3.1)   - Adds server-side session

support to your Flask

application

Flask-Styleguide (0.4.0)   - A living Styleguide for your

Flask application.

Flask-Kits (0.0.8)   - demo

Flask-Locale (1.0.2)   - Adds i18n/l10n support to

Flask applications easily.

Uses CSV files(or database)

to load translations.

flask-openldap (0.0.9)   - Flask extension to query an

openLDAP server

oleg-flask-sessions (0.2.5)   - Oleg DB backed sessions for

Flask

Flask-Foundation (2.1)   - An extension that includes

the Foundation css framework
in your project, without any
boilerplate code.

Flask-MQTT (0.0.8)   - Flask extension for the MQTT
protocol

Flask-SuperAdmin (1.7.1)   - The best admin interface
framework for Python. With
scaffolding for MongoEngine,
Django and SQLAlchemy.

Flask-WhooshAlchemy (0.8)   - Whoosh extension to
Flask/SQLAlchemy

Flask-Mustache (0.4.1)   - Mustache for Flask

Flask-OpenTracing (0.1.7)   - OpenTracing support for Flask
applications

Flask-Vue (0.3.5)   - Vue.js 1.0+ integration for
Flask (Python 3 version)

Flask-OAuth2-Provider (0.3.2)   - A simple flask oauth2
provider

Flask-Prose (0.1.56)   - A flask extension for
generating markov prose

Flask-Redis (0.3.0)   - Redis Extension for Flask
Applications

Flask-Stormpath-Plus (0.2.4)   - Simple and more secure user
authentication for Flask via
Stormpath.

Flask-Principal (0.4.0)   - Identity management for flask

flask-tat (0.0.10)   - Flask TAT client

Flask-WebTest (0.0.9)   - Utilities for testing Flask
applications with WebTest.

Flask-OAuth2-Login (0.0.9)   - Simple OAuth2 login

Flask-INIConfig (0.1.0)   - A flask extension to load ini

files via config

flask-request-validator (2.0.3)   - Flask request data validation

Flask-RESTeasy (0.0.8)   - Create easy REST APIs with

Flask

Flask-Store (0.0.4.4)   - Provides Django-Storages like

file storage backends for

Flask Applications.

Flask-Gravatar (0.4.2)   - Small extension for Flask to

make usage of Gravatar

service easy.

Flask-Multi-Redis (0.1.5)   - MultiThreaded MultiServers

Redis Extension for Flask

Applications

Flask-PageDown (0.2.2)   - Implementation of

StackOverflow's "PageDown"

markdown editor for Flask-

WTF.

Flask-Twitter-OEmbedder (0.1.8)   - Embedded tweets in Flask

Jinja2 Templates with only

the Tweet_ID

Flask-Json-Syslog (0.1.28)   - Output syslog of the json

format.

Flask-Social (1.6.2)   - Simple OAuth provider

integration for Flask-

Security

Flask-Z3950 (0.3.2)   - Z39.50 integration for Flask

applications.

Flask-MxitGA (0.10)   - Google analytics for flask

and mxit.

Flask-KVSession (0.6.2)   - Transparent server-side

session support for flask

Flask-Lastuser (0.3.12)   - Flask extension for Lastuser

flask-monitor (0.2.5)   - Flask Monitor module

Flask-Negotiation (0.1.9)   - Better content negotiation

for flask

flask-oidc (1.1.1)   - OpenID Connect extension for

Flask

Flask-Permissions (0.2.3)   - Simple user permissions for

Flask

Flask-Weixin-Pay (0.3.4)   - Weixin Pay from Flask

flask-ptrans (1.4)   - Flask extension for

localisation of templates

from JSON files

Flask-NSFW (6)   - Flask-NSFW blocks all the

requests that contains images

with nudity.

Flask-Funnel (0.1.10)   - Asset management for Flask.

Flask-Plugins (1.6.1)   - Create plugins for your Flask

application

Flask-SimpleLDAP (1.2.0)   - LDAP authentication extension

for Flask

flask-heroku (0.1.9)   - Heroku environment variable

configurations for Flask

flask-login-openerp (0.5.1)   - OpenERP Login for Flask using

Flask-Login

flask-logmanager (0.2.10)   - Flask LogManager module

Flask-Loopback (1.4.5)   - Library for faking HTTP

requests using flask

applications without actual

network operations

flask-marshmallow (0.8.0)   - Flask + marshmallow for

beautiful APIs

Flask-Moment (0.5.2)   - Formatting of dates and times

in Flask templates using

moment.js.

Flask-Pusher (1.2.1)   - Flask extension for Pusher

Flask-RAML (0.2.2)   - Flask-RAML (REST API Markup

Language) API server with

parameter conversion,

response encoding, and

examples

Flask-Neo4j (0.5.1)   - Flask extension providing

integration with Neo4j.

Flask-WebCache (0.9.1)   - A Flask extension that adds

HTTP based caching to Flask

apps

Flask-Images (2.1.2)   - Dynamic image resizing for

Flask.

Flask-Tus (0.7.1)   - TUS protocol implementation

Flask-MailGun3 (0.1.5)   - Flask extension to use the

Mailgun email parsing service

flask-hookserver (1.1.0)   - Server for GitHub webhooks

using Flask

Flask-pyoidc (1.2.0)   - Flask extension for OpenID

Connect authentication.

Flask-OpenID (1.2.5)	- OpenID support for Flask
flask-spawn (0.1.11)	- Generate new flask projects quickly and easily, in a variety of customisable structures.
flask-ldap3-login (0.9.13)	- LDAP Support for Flask in Python3/2
Flask-Micropub (0.2.6)	- Adds support for Micropub clients.
flask-ripozo (1.0.4)	- An extension for ripozo and that brings HATEOAS/REST/Hypermedia apis to flask
Flask-GoogleMaps (0.2.5)	- FlaskGoogleMaps - Google Maps Extension for Flask
flask-resty-tenants (0.5.3)	- Flask Resty Authorization module for multitenancy
Flask-QRcode (1.0.1)	- An concise flask extension to render QR codes
Flask-JinjaHelpers (0.3.7)	- Various helpers for Flask based Jinja2 templates.
Flask-PyMongo (0.5.1)	- PyMongo support for Flask applications
Flask-Sijax (0.4.1)	- An extension for the Flask microframework that adds Sijax support.
Flask-Navigate (0.2.2)	- Another flask extension that provides Navigation menus.
Flask-Holster (0.3.4)	- Rigid MVC content negotiation

for Flask

Flask-Testing (0.6.2)   - Unit testing for Flask

Flask-WXPay (0.1.13)   - Flask Extension for WeChat

Pay.

Flask-Material (0.1.1)   - An extension that includes

Materialize CSS

(http://materializecss.com/)

in your project, without any

boilerplate code.

flask-mwoauth (0.3.61)   - Flask blueprint to connect to

a MediaWiki OAuth server

Flask-MustacheJS (0.6.0)   - Mustache integration in

Flask, with Jinja and client-

side libraries.

flask-swagger (0.2.13)   - Extract swagger specs from

your flask project

Flask-Imagine (0.5)   - Extension which provides easy

image manipulation support in

Flask applications.

Frozen-Flask (0.15)   - Freezes a Flask application

into a set of static files.

Flask-PW (1.0.3)   - Peewee ORM integration for

Flask framework

flask-musers (0.5.4)   - Flask app for store user in

MongoDB and simple views for

login, logout and

registration.

Flask-SQLAlchemy (2.3.0)   - Adds SQLAlchemy support to

your Flask application

Flask-Pypi-Proxy (0.5.1)   - A Pypi proxy

Flask-JSONAPIView (0.1.0)   - DEPRECATED: This library has

been renamed to Flask-RESTy

Flask-Validator (1.2.3)   - Data validator for Flask and

SQL-Alchemy, working at Model

component with events

twopi-flask-utils (1.1.8)   - A set of utilities to make

working with flask web

applications easier.

Flask-LwAdmin (0.6.3)   - Flask-LwAdmin is minimalistic

administrative interface

building extension for the

Flask framework

flask-praetorian (0.3.13)   - Strong, Simple, and Precise

security for Flask APIs

flask-whooshee (0.5.0)   - Flask-SQLAlchemy - Whoosh

Integration

flask-restful-swagger (0.19)   - Extrarct swagger specs from

your flast-restful project

Flask-Login (0.4.0)   - User session management for

Flask

Flask-Injector (0.10.0)   - Adds Injector, a Dependency

Injection framework, support

to Flask.

Flask-MongoAlchemy (0.7.2)   - Add Flask support for MongoDB

using MongoAlchemy.

Flask-GoogleLogin (0.3.1)   - Extends Flask-Login to use

Google's OAuth2 authorization

flask-mongoengine (0.9.3)   - Flask-MongoEngine is a Flask

extension that provides
integration with MongoEngine
and WTF model forms.

Flask-Perm (0.2.8)   - Flask Permission Management
Extension

flask-zeus (0.2.1)   - UNKNOWN

Flask-MarcoPolo (0.6.3)   - Flask-MarcoPolo Flask-
MarcoPolo is a Flask
extension that adds structure
to both your views and
templates, by mapping them to
each other to provide a rapid
application development
framework. The extension also
comes with Flask-Classy,
Flask-Assets, Flask-Mail,
JQuery 2.x, Bootstrap 3.x,
Font-Awesome, Bootswatch
templates. The extension also
provides pre-made templates
for error pages and macros.
https://github.com/mardix
/flask-marcopolo

pytest-flask (0.10.0)   - A set of py.test fixtures to
test Flask applications.

Flask-paginate (0.5.0)   - Simple paginate support for
flask

Flask-LoginManager (1.1.6)   - Flask-Loginmanager supports
multiple roles and

permissions for Flask,

inspired by Flask-Login

Flask-OAuthlib (0.9.4)   - OAuthlib for Flask

Flask-REST-JSONAPI (0.12.6)   - Flask extension to create

REST web api according to

JSONAPI 1.0 specification

with Flask, Marshmallow

and data provider of your

choice (SQLAlchemy, MongoDB,

...)

Flask-Maple (0.5.0)   - captcha ,bootstrap,easy login

and more flask tips.

Flask-HTTPAuth (3.2.3)   - Basic and Digest HTTP

authentication for Flask

routes

Flask-Slither (1.1.7)   - A small library between

MongoDB and JSON API

endpoints

Flask (0.12.2)   - A microframework based on

Werkzeug, Jinja2 and good

intentions

Flask-Jerify (0.0.23)   - Validate JSON requests

against schemas

Flask-Script (2.0.6)   - Scripting support for Flask

GitHub-Flask (3.1.7)   - GitHub extension for Flask

microframework

Flask-SeaSurf (0.2.2)   - An updated CSRF extension for

Flask.

Flask-Restless (1.0.0b1)   - A Flask extension for easy

ReSTful API generation

Flask-LDAPConn (0.6.13)   - Pure python, LDAP connection

and ORM for Flask

Applications

Flask-Resize (2.0.3)   - Flask extension for resizing

images in code and templates

Flask-Migrate (2.1.1)   - SQLAlchemy database

migrations for Flask

applications using Alembic

Flask-WTF-FlexWidgets (0.1.25)   - A flask extension that

provides customizable WTF

widgets and macros.

flask-peewee (0.6.7)   - Peewee integration for flask

Flask-Security (3.0.0)   - Simple security for Flask

apps.

Flask-Mail (0.9.1)   - Flask extension for sending

email

Flask-RESTful (0.3.6)   - Simple framework for creating

REST APIs

Flask-Table (0.4.1)   - HTML tables for use with the

Flask micro-framework

flask-restplus (0.10.1)   - Fully featured framework for

fast, easy and documented API

development with Flask

Flask-S3 (0.3.3)   - Seamlessly serve the static

files of your Flask app from

Amazon S3

flask-transmute (1.3.0)   - a flask plugin to generate

routes from objects.

Flask-uWSGI-WebSocket (0.6.0)   - High-performance webSockets

for your Flask apps powered

by uWSGI.

Flask-Stormpath (0.4.8)   - Simple and secure user

authentication for Flask via

Stormpath.

flask-magic (0.0.53)   - A full stack Flask based

framework that put structure

in the file system. Features:

Caching, Mailing, Storage,

CSRF, recaptcha and more

flask-io (1.12.0)   - Flask-IO is a library for

parsing Flask request

arguments into parameters and

for serialization of complex

objects into Flask response.

Flask-RESTy (0.11.6)   - Building blocks for REST APIs

for Flask

Flask-WTF (0.14.2)   - Simple integration of Flask

and WTForms.

Flask-User (0.6.19)   - Customizable User

Authentication and

Management, and more.

Flask-Wizard (0.5.6)   - Rapid and easy chatbot

development in Python for

multiple channels

Flask-Limiter (0.9.5.1)   - Rate limiting for flask

applications

flask-restaction (0.25.3)   - A web framwork born to create

RESTful API

RESTful API

Flask-SocketIO (2.9.2)   - Socket.IO integration for
Flask applications

Flask-Potion (0.14.1)   - Powerful REST API framework
for Flask and SQLAlchemy

Flask-Restler (1.10.0)   - Build REST API for Flask
using Marshmallow.

flask-xxl (0.9.20)   - quick way to design large
flask projects

microcosm-flask (0.82.0)   - Opinionated persistence with
FlaskQL

flask2postman (1.4.3)   - Generate a Postman collection
from your Flask application

flask_accept (0.0.3)   - Custom Accept header routing
support for Flask

flask_aide (0.0.1)   - demo

flask_alcohol (0.2.2)   - Automatically generate API
routes from Flask-SQLAlchemy
models

flask_ample (0.0.1)   - basic setup of ample for
flask

flask_api_builder (0.2.0)   - A shortcut for stubbing out
your RESTful Flask APIs

flask_app_generator (0.1.0)   - Flask Project Generator

flask_autorest (0.1.5)   - auto create restful apis for

database, with the help of
dataset.

flask_backstage (0.2.1)   - A backstage framework with
very few code.

flask_base64_mem_session (1.0.2)   - Use base64 encoder on

flask_base64_msm_session (1.0.2)   - Use base64 encoder on

memcached server. And it will

use memcached on session

flask_basic_roles (0.2)   - A plugin for adding very

simple users + roles to a

flask app

flask_cache_external_assets (0.2.0)   - Flask extension for caching

external assets

flask_checkargs (0.1.2)   - A module to simplify checking

arguments in Flask apps

flask_chip (0.1.2)   - A token generator for Flask

apps.

flask_clapi (0.2.0)   - CLAPI wrapper

flask_cm (0.8.1)   - Cloud Mesh: managing multiple

virtual machines in Clouds

flask_datatables (0.6.17)   - Integrates SQLAlchemy with

DataTables (framework Flask)

flask_dino_utils (0.1.11)   - Flask utils package to use it

among with Flask-Classy and

marshmallow

flask_doc (0.2.5)   - Write API document when you

coding, Test your API when

you press last word

immediately

flask_error (0.1)   - A simple and extensible way

of displaying error messages.

flask_ext_migrate (1.0.1)   - A sourcecode manipulation

tool for converting imports.

flask_extras (4.0.3)   - Assorted useful flask views,

blueprints, Jinja2 template

blueprints, Jinja2 template

filters, and templates/macros

flask_flaskwork (0.1.11)   - A Flask plugin to talk with

the Flaskwork Chrome

extension.

flask_frink (0.0.1)   - Add Flask-Security datastore

functionality to Frink.

flask_github_proxy (0.0.2)   - Plugin to build services to

push data from a website to

github with PullRequests

confirmation

flask_helpers (0.1)   - Useful stuff for Flask

application

flask_introspect (0.0.1)   - basic setup of ample for

flask

flask_json_multidict (1.0.0)   - Convert Flask's

`request.get_json` dict into

a MultiDict like

`request.form`

flask_json_resource (0.2.18)   - UNKNOWN

flask_jsondash (6.2.3)   - Easily configurable, chart

dashboards from any arbitrary

API endpoint. JSON config

only. Ready to go.

flask_jsontools (0.1.1-0)   - JSON API tools for Flask

Flask_LDAP_View (0.3)   - A library to restrict your

flask pages by LDAP groups

flask_locust (0.0.2-alpha)   - SQL-Migrations for your

Application

flask_markdown2 (0.0.3)   - A flask extension that adds a

flask_markdown2 (0.0.0)   - A flask extension that adds a

{% markdown %} tag to

templates.

flask_nameko (1.4.0)   - A wrapper for using nameko

services with Flask

flask_neglog (0.0.2)   - demo

flask_nemo (1.0.1)   - Flask Extension to browse CTS

Repository

flask_ogm (1.1.0a9)   - Add support for the py2neo

Object Graph Mapper to your

app

flask_open_directory (0.1.1)   - MacOS OpenDirectory

Authorization Middleware for

Flask

flask_params (1.0.1)   - Processes the Request params

for Flask served as a Python

library

flask_profiler (1.5)   - API endpoint profiler for

Flask framework

flask_raven (0.0.4)   - A flask extension for the

University of Cambridge's

authentication system

flask_rdf (0.2.0)   - Flask decorator to output RDF

using content negotiation

flask_react (0.0.5)   - Auto setup tool for flask and

react project

flask_render_specific_template (1.0)   - This library allows Flask

developers to dynamically

select the template directory

used for rendering

used for rendering

flask_replicated (1.2)   - Flask SqlAlchemy router for

stateful master-slave

replication

flask_reqparse (2.2.1)   - flask_reqparse is a simple

wrapper around flask request

module that helps to parse

args efficently.

flask_rest_toolkit (0.0.1)   - A set of tools to create

simple Flask REST web

services and APIs

flask_restframework (0.1.1)   - Web APIs for Flask, made

easy, inspired from Django

DRF.

flask_restful_jsonschema (0.1.1)   - Provides a wrapper which

provides valid json to

Resource methods.

flask_restful_url_generator (0.0.4)   - flask-restful URLs list

flask_resty_swagger (0.1.3)   - Generate swagger

documentation from flask-

resty service

flask_sandboy (0.0.3)   - Automated REST APIs for

SQLAlchemy models

flask_script_extras (0.1.4)   - extras commands to Flask-

Script.

flask_servatus (0.1.3)   - A port of djangos storages

framework for use with flask

applications

flask_servicenow (0.1.1)   - ServiceNow REST API Flask

extension

...extension.

flask_siilo (0.1.2)   - A simple storage for Flask
                                       based on siilo.

flask_simple_sitemap (0.0.3)   -

flask_simplelogin (0.0.6)   - Flask Simple Login - Login
                                       Extension for Flask

flask_simplerest (1.0.3)   - A Flask extension for easy
                                       ReSTful API generation

flask_singleview (0.2.1)   - A flask micro extension for
                                       building single-view web
                                       apps.

flask_slackbot (0.2.1)   - Deal with slack outgoing
                                       webhook

flask_sqla_debug (0.2)   - Helpers for debugging flask
                                       and sqlalchemy performance

flask_tlsauth (0.1.3)   - Flask extension implementing
                                       TLS Authentication - simple
                                       client certificate CA
                                       inclusive

flask_trace (0.0.4)   - Log trace decorator function
                                       for Flask

flask_tryton (0.6)   - Adds Tryton support to Flask
                                       application

flask_typed_mounter (0.2.1)   - Decorator to mount a function
                                       to a Flask endpoint

flask_util_js (0.2.25)   - flask's util in javascript.
                                       such as url_for etc.

flask_voluptuous (0.1.2)   - A simple flask extension for
                                       data validation with
                                       Voluptuous

flask_web_args (0.1.2)   - A library to help easily

parse/validate web arguments

with Flask

flask_wx (0.0.1)   - A simple and brief utility

tools framework

flask_yamlpage (0.0.6)   - Flatpages in yaml syntax

flaskcbv (1.4.11)   - FlaskCBV is Alternative

Framework for working with

flask with the class Based

Views approach (CBV)

flaskchatterbot (0.1.0)   - An open-source web based

Python chat bot in Flask.

flaskckeditor (1.6)   - flask后台快速集成ckeditor编辑器

FlaskCms (0.0.4)   - UNKNOWN

FlaskDeferredHandler (0.1)   - A Flask handler for the

Google Appengine's deferred

library

flasker (0.1.45)   - Flask, SQLAlchemy, and Celery

integration

FlaskEx (0.0.66)   - UNKNOWN

flaskhmac (1.2.1)   - Provides easy integration of

the HMAC signatures for your

REST Flask Applications.

flaskinit (0.0.1)   - Bootstraps Flask projects

flaskit (0.1.0)   - Utilies for Flask

application.

flaskJSONRPCServer (0.9.3)   - A Python JSON-RPC over HTTP

with flask and gevent

flaskle (0.4)   - bottle-like utility

` , ` y

decorators for flask

pumpwood-flaskmisc (0.0.0.2)   - Misceletiuns fucntions and

class to help development of

PumpWood on Flash

flaskmogrify (0.0.9)   - Flaskmogrify, a simple Flask

single pageapplication to

convert (w/ Ajax) user-pasted

text using an arbitrary text

conversion function.

flaskpress-themes (0.1.5)   - Provides infrastructure for

theming FlaskPress

applications

flaskpress (0.0.1)   - Python Flask CMS

flaskpress-speaklater (1.3.0)   - Implements a lazy string for

python for use with gettext

FlaskPusher (1.0.1)   - Adds Pusher support for your

Flask application.

flaskrestframework (0.1.4)   - Web APIs for Flask, made

easy.

flaskrestgen (0.4)   - A restful API generator for

flask/sqlalchemy declarative

models.

FlaskSearch (0.1)   - Powerful search functionality

for Flask apps via

ElasticSearch

flaskserver (0.1.1)   - simple web server with Flask

flasksr (0.6)   - Start streaming HTTP

Responses based on your page

layout for Flask and improve

Time for First Paint.

flaskstrap (0.3.6)   - Easily create a flask, nginx,

uwsgi and bootstrap project

ready for deployment

flaskup (0.3.2)   - A simple Flask application to

share files.

FlaskWarts (0.1a8)   - Assortment of various

utilities for Flask

applications

flaskwork (0.1.1)   - UNKNOWN

Flasky (0.1.0)   - Lazy man's Flask Application

FlaskyTornado (0.0.43)   - A microframework based on

Tornado and Flask and good

intentions

flatly (0.3)   - Pyramid scaffold that is

flat. Kind of like Flask.

fleaker (0.4.3)   - Tools and extensions to make

Flask development easier.

flekky (0.4.1)   - Static website generator

inspired by jekyll based on

flask.

flexrest (0.1.9)   - Flexible Flask Rest Api

FliKISS (0.1)   - Wiki engine based on Markdown

flat files powered by Flask

flump (0.11.1)   - REST API builder using Flask

routing and Marshmallow

schemas.

flymph (0.1.3)   - Flask as Lymph Web API

gitlab-freak (1.0.0a1)   - A Flask server that allows

you to interact with Trello
from your own Gitlab, and
keep track of your projects
dependencies.

Fregger (0.10.6)   - Automatically generate
Swagger docs for Flask-
Restful.

frl (0.0.4)   - flask/requests logging

froth (0.0.1)   - Data Visualization Template
Engine for Django/Flask=

frs (0.0.0.dev11)   - Flask-RESTful
Swagger(-driven) Validation

fss (0.2.1)   - Compile Flask/Jinja2 site
into static html content

funkyserver (0.1)   - FunkyServer is simple package
to create Flask servers in
background processes.

Funnel (0.1)   - Flask extension for Beaker

fuser (1.0.4)   - A library to handle user
related tasks in Flask

fvsd (1.0.3)   - Flask+VueJS+SemanticUI+Docker
CLI boilerplate.

gdbgui (0.7.9.5)   - browser-based gdb frontend
using Flask and JavaScript to

visually debug C, C++, Go, or
Rust

getolaf (1.0.2)   - A static site generator based
on flask and markdown

git-golem (0.1)   - Git web interface using

libgit2 and flask

git-webhook (0.0.6)   - 使用 Python Flask + SQLAchemy +

Celery + Redis + React

开发的用于迅速搭建并使用 WebHook

进行自动化部署和运维，支持 Github / GitLab

/ Gogs / GitOsc。

Glask (0.0.23)   - An extension for flask

applications with best

practices.

glassblower (0.2.5)   - The Best Flask Boilerplate

Framework

Gluino (0.4)   - port of web2py libs to

bottle, flask, pyramid,

tornado (includes copy of

modules from the web2py

framework)

goblet (0.3.5)   - Git web interface using

libgit2 and flask

google_forms (0.3)   - Flask web proxy for Google

forms

graphscraper (0.1.1)   - Graph implementation that

loads graph data (nodes and

edges) from external sources

and caches the loaded data in

a database using sqlalchemy

or flask-sqlalchemy.

groundwork-sphinx-theme (1.0.5)   - Sphinx theme for groundwork

projects (Based on

flask_theme)

halef-SETU (0.0.5)   - halef-SETU provides an easy

wrapper around SKLL models

for statistical language

understanding as well as an

easy to API based on Flask

happymongo (0.1.1)   - Python module for making it

easy and consistent to

connect to MongoDB via

PyMongo either in Flask or in

a non-flask application

Harambe (0.10.0)   - A mid stack Flask based

framework that put structure

in the file system. Features:

Caching, Mailing, Storage,

CSRF, recaptcha, Cors.

Supports HTML, Markdown and

Jade and more

haven (1.1.107)   - flask's style binary server

framework

py-healthcheck (1.6.1)   - Adds healthcheck endpoints to

Flask or Tornado apps

healthcheck (1.3.2)   - Adds healthcheck endpoints to

Flask apps

hflossk (0.5.10)   - HFOSS course materials via

flask

highfield (1.0.21)   - Structured flask with mongo

HipPocket (0.1.2a)   - A wrapper around Flask to

ease the development of

larger applications

horn ((latest release))   - Hy Macros for Flask

http-server-livereload (1.1.0)   - A monkey patch of http.server

                                       to call livereload when

                                       server_forever is called.

                                       This is compatible with flask

                                       reload and tiny-lr (grunt

                                       watch).

hxl-proxy (1.3)   - Flask-based web proxy for HXL

jac (0.16.1)   - A Jinja extension (compatible

                                       with Flask and other

                                       frameworks) to compile and/or

                                       compress your assets.

Jalapeno (0.1.4)   - Static Site Generator based

                                       on Flask

jiac (0.2.1)   - A Jinja extension (compatible

                                       with Flask) to compile and/or

                                       compress your assets inline.

jobmonitor (0.0.5)   - Physics-orientated job

                                       monitoring over HTTP with

                                       Flask.

json-validator (1.0)   - Provide decorator for

                                       validating json parameters

                                       passed to function. Can be

                                       used for validation of json

                                       parameters sent to Flask.

py-json-rpc (0.0.3)   - Decorator based toolkit to

                                       use JSONRPC easy like Flask

Juice (0.0.23)   - A full stack Flask based

                                       framework that put structure

in the file system. Features:
Caching, Mailing, Storage,
CSRF, recaptcha and more

JYFlask (0.1)   - Jing Yun Flask

Keg (0.6.0)   - A web framework built on
Flask & SQLAlchemy.
Somewhere North of Flask but
South of Django.

KegBouncer (2.2.3)   - A three-tiered permissions
model for KegElements built
atop Flask-User

kipavois (0.1.2)   - Flask proxy over Kibana with
KiPavois

kit (0.2.15)   - Flask, Celery, SQLAlchemy
integration framework.

kola (1.5.6)   - flask's style json server
framework

kube_shields (0.0.6)   - kube shields flask frontend.

zeus-lab804 (0.1.2)   - Fast create scaffold of
flask.

Lagring (0.2.7.1)   - Asset storage for Flask

lanfit-resp (0.1.2)   - requests to flask response
with Link header.

Lapin (0.01a1)   - A flask-based web framework

lapti (0.0.1)   - Simple utils for flask and
peewee projects

latexrender (0.3.6)   - A simple Flask app for
rendering latex snippets into
images.

lever (0.2.6)   - A tool for exposing

SQLAlchemy models in Flask

via REST

littlefish (0.0.15)   - Flask webapp utility

functions by Little Fish

Solutions LTD

python-rabbitmq-logging (0.0.3)   - Send logs to RabbitMQ from

Python/Flask

logy (0.1)   - A flask based web application

for central logging

lraudit (0.1.1)   - Adds auditing to LR Flask

apps

lrutilities (0.1.2)   - Utilities for LR Flask apps

lrutils (0.1.4)   - Utilities for LR Flask apps

mack (0.1.1)   - A simple Flask project

generator

madame (0.1.2.a)   - RESTful API for MongoDB built

on Flask

magic-xxl (0.6.1)   - A collection librairies to

work with Flask-Magic

tornado-mail (0.4.0)   - A email plugin for tornado.

It is a fake Flask_mail.

Mambo (1.0.0b21)   - A mid stack Flask based

framework that put structure

in the file system. Features:

Caching, Mailing, Storage,

CSRF, recaptcha and more

mana (4.8)   - the missing startproject

command for Flask

mana0 (0.10)   - my flask toolkit

mana2 (0.15)   - my flask toolkit

mana3 (0.15)   - my flask toolkit

mana4 (0.15)   - my flask toolkit

simple-site-manager (0.1.7)   - Manage multiple lighttpd and

Django or Flask websites on a

single machine.

script-manager (0.1.0)   - A command-line interface.

Just a simple and crude

implementation of Flask-

Script.

mandrill_webhooks (0.1.0)   - Flask Webhooks

manhattan_dispatch (0.0.4)   - A middleware dispatcher for

Flask based on   we

rkzeug.wsgi.DispatcherMiddlew

are.

markov_autocomplete (1.0.1)   - Autocomplete model easy to

integrate with Flask apps

mediaflask (0.2.1)   - Download audio from online

videos.

mediatumbabel (0.1.1)   - flask-babel port to provide

i18n for mediaTUM (+jinja2)

with some improvements

meteorpi_server (0.1.5)   - HTTP server based on Flask

providing a remote API

Microbe (1.2)   - Micro Blog Engine inspired by

Pelican and powered by Flask

oauth-middleware (0.3.3)   - Simple flask_oauthlib based

middleware for WSGI app to

preform oauth

simple-migrate (0.0.3)   - A simple database migrate

tool for flask

mimerender (0.6.0)   - RESTful HTTP Content

Negotiation for Flask,

Bottle, web.py and webapp2

(Google App Engine)

mkflask_module (0.1.1)   - Python module

Mlask (0.2)   - manage.py for Flask

Mocha (0.9.0)   - A mid stack Flask based

framework that put structure

in the file system. Features:

Caching, Mailing, Storage,

CSRF, recaptcha, Cors.

Supports HTML, Markdown and

Jade and more

moesifwsgi (1.0.0)   - Moesif Middleware for Python

WSGI based flatforms (Flask,

Bottle & Others)

moflask (0.1)   - Re-usable flask utilities.

pyramid-mongoengine (0.0.9)   - Mongoengine Pyramid extension

based in flask-mongoengine

redis-monitor (1.0.3)   - 使用Flask开发的一个 web 可视化的 redis

监控程序，可以查看 redis 的服务器信息、实时监控

redis 的消息处理 ops、内存占用、cpu

消耗，以及 redis 联通时间。 A web

visualization redis

monitoring program.

Performance optimized and

very easy to install and
deploy. the monitor data come
from redis.info().

myflaskr (0.0.1)   - A test upload for PyPI

nails (0.1.0)   - A python MVC framework built
with Flask

NCTU-Oauth (0.1.0)   - adds NCTU-Oauth support to
flask

notes-pico (0.8.5)   - A note-taking example web
application for Picoweb web
pico-framework. (Ported from
Flask original)

nyt-pyiap (0.0.11)   - Python utility functions and
Django/Flask middlewares for
validating JWT tokens from
Google's Identity-Aware Proxy

odinweb.flask (0.4.0)   - Toolkit for building web
API's using Odin and Flask.

ofcourse (0.2.5)   - Python courseware with Flask
on OpenShift

onyx_sqlalchemy (3.2)   - flask_sqlalchemy for Onyx

onyxbabel (0.0.3)   - Ramake of the Flask_BabelEX
for Onyx

Openedoo-Script-Test (0.1.2)   - Scripting support for Flask

openedoo (1.1.0.19)   - openedoo is backend service
for education base on flask

palmer (0.0.4)   - Redice Flask Boost Library.
Inspired by flask-api.

paqmind.flask-paqforms (1.0.0)   - UNKNOWN

paqmind.flask-routes (0.2.4)   - Class-based routes for Flask

paqmind.flask-views (0.5.1)   - Class-based views for Flask

sanic-patched (0.4.1)   - A microframework based on
uvloop, httptools, and
learnings of flask

perfume (0.2)   - Simple Object Oriented layer
for Flask.

permission (0.4.1)   - Simple and flexible
permission control for Flask
app.

phial (0.2.0)   - A static website generator
that takes motivation from
Flask and Jekyll.

Phial-Toolset (1.0.2)   - Non-intrusive toolset to
easily use
Flask/Peewee/Celery

phovea_security_flask (0.1.0)   - UNKNOWN

PlatformoClient (0.0.7)   - 收集Flask的请求响应时间并发送至logstash

plush_web (0.1.0)   - Micro framework inspirated by
Sinatra, Express and Flask.

podhub.meh (0.1.12)   - Flask framework with
defaults.

Pontus (0.2.1)   - Flask utility for Amazon S3.

ponywhoosh (1.7.6)   - Your database now searchable.

The backend behind the Flask-
PonyWhoosh.

Portfolio-py (0.0.1)   - Portfolio is a Flask based
framework that adds structure
and map your views and

templates together for rapid

application development

pour (0.2.1)   - A lightweight Flask app

generator.

preflask (0.2)   - flask & preprocessors,

together, forever <3

Prestige (0.0.1)   - Pylot is a Flask extension

that adds structure and map

your views and templates

together for rapid

application development

proxapy (0.1.5)   - Simple API proxy that uses

Flask/requests/gunicorn.

py3web (0.3.14)   - Django lets you write web

apps in Django. Flask lets

you write web apps in Flask.

Py3web lets you write web

apps in Python.

py_blueprints (1.0.1)   - Flask ready to go blueprints

pygrest (0.3)   - Build REST APIs with Neo4j

and Flask, as quickly as

possible!

Pylot (0.0.4)   - Pylot is a Flask extension

that adds structure and map

your views and templates

together for rapid

application development

PyMessager (1.0.0)   - A Python SDK and Flask API to

develop chatbot on Facebook

Message Platform

pyros_config (0.2.0)   - Classes to manage a server

configuration. Heavily

inspired by flask

python-thumbnails (0.5.1)   - Thumbnails for Django, Flask

and other Python projects.

PyTyrion (1.0.1)   - 支持Tornado、Django、Bottle、Flask

的Web表单验证

pyxley (0.1.0)   - Python tools for building

Flask-based web applications

qiniufs (1.0.1)   - qiniu file uploader for

flask!

Quart (0.2.0)   - A Python asyncio web

microframework with the same

API as Flask

quorum (0.5.12)   - Quorum Extensions for Flask

rapidserv (2.0.0)   - A non-blocking Flask-like Web

Framework in python.

Redberry (0.0.7.5)   - Flask Blueprint for adding

simple CMS functionality

relask (0.1.0)   - A Relay-based web development

kit on Flask

reportexport (0.0.3)   - A Flask microservice that

produces reports out of a

database in xml and pdf

format.

RESTfulEf (0.1.1)   - A generic restful api

generator based on elixir and

flask

Tornado-Restless (0.4.5) - flask-restless adopted for tornado

restpager (0.1) - A RESTful pager class for Flask

revise (0.0.3) - Simple Schemas for Flask JSON Validation

ripozo (1.3.0) - ReSTful API framework with HATEOAS support and compatibility with Flask, Django, SQLAlchemy and more.

rororo (1.0.0) - Collection of utilities, helpers, and principles for building Python backend applications. Supports aiohttp.web, Flask, and your web-framework

serverless-runlocal (0.1.2) - Serverless configuration parser to run your serverless function as Flask.

safrs (0.1.1) - safrs : SqlAlchemy Flask-Restful Swagger2

Sanic (0.6.0) - A microframework based on uvloop, httptools, and learnings of flask

sbswebsite (0.0.23) - Flask based project to create a personal site

sga (0.1.39) - make it easier to use pyga for web develop. and make pyga compatible with flask

and django.

Shaft (0.0.8)   - A mid stack Flask based

framework that put structure

in the file system. Features:

Caching, Mailing, Storage,

CSRF, recaptcha, Cors.

Supports HTML, Markdown and

Jade and more

Shake (1.6.4)   - A lightweight web framework

based on Werkzeug and Jinja2

as an alternative to Flask

ShelfCMS (0.12.25)   - Enhancing flask

microframework with beautiful

admin and cms-like features

shiftboiler (0.1.7)   - Best practices setup for

webapps, apis and cli

applications with flask

simple_flask_server (0.0.2)   - Flask equivalent of python -m

SimpleHTTPServer.

simple_openid (1.0.6)   - Simple OpenID. One-line setup

for OpenID login for Flask.

simpleapi (0.0.9)   - A simple API-framework to

provide an easy to use,

consistent and portable

client/server-architecture

(for django, flask and a lot

more).

SimpleFlask (0.1.0)   - Simple Flask application.

SimpleFlaskBlueprint (0.1.1)   - Simple Flask blueprint.

SimpleSQLProxy (1.0)   - A simple sqlproxy for SQL
LITE databases based on flask

skaffold (0.1)   - Flask/SQLAlchemy Admin
Scaffold

slask (0.1.1)   - A Flask app to republish to
Slack

Slingr (0.0.13)   - Web development framework
that builds and serves Cobs
(deployable web
applications), running on top
of Flask

SmallScrewdriver (1.0.2)   - SmallScrewdriver is python
texture packer library, with
frontend's on PySide GUI,
Flask/React.js, and console

solidwebpush (1.2.1)   - This package lets your server
send Web Push Notifications
to your clients. NOTE: No
particular web framework are
required (e.g. Django, Flask,
Pyramid, etc.), since it was
originally designed to run on
a Raspberry Pi with no web
server installed (only a bare

Python program listening on a
port for HTTP requests).

spill (0.0.1a0)   - A utility for generating
Flask scaffolding and
boilerplate.

spouk_utils (0.1)   - some utils for flask

distributions

StasFliKISS (0.1.2)   - Wiki engine based on Markdown
